*No. 778P.—The 24th January 1914.*—The following is published for general information.

J. G. CUMMING.

*Offy. Chief Secy. to the Govt. of Bengal.*

No. 2831—42.

*Extract (paragraphs 1 and 2) from the Proceedings of the Government of India in the Home Department (Public), under date Calcutta, the 8th December 1899.*

### RESOLUTION.

THE Secretary of State for India has brought to the notice of the Government of India that it not infrequently happens that natives of India, students or others, who have proceeded to England, desire to obtain passports to enable them to travel to foreign countries in which the possession of a passport is necessary or desirable, and that difficulty often arises from want of evidence to show that the applicant is a British subject, and therefore entitled to a passport. Appeals for assistance are also frequently addressed to His Lordship by destitute Indians who desire to return to their country and by students who, owing to embarrassed circumstances, are unable to complete their course of education.

2. In order to enable the Secretary of State to deal with such cases satisfactorily, the Governor-General in Council has decided that it is necessary to press upon Indian students and others visiting England the desirability of providing themselves, before their departure from India, with an authoritative certificate of identity, in the form appended to this Resolution, signed by the head of the district (in a Presidency town, the Commissioner of Police) in the case of residents of British India and by the Political Officer in that of residents of Native States. For a student the certificate should be signed by the head of his last school or college, and countersigned by the District Officer (in a Presidency Town, the Commissioner of Police) or Political Officer, as the case may be.

**No. 15 Marine.**—The following Resolution by the Government of India, in the Department of Commerce and Industry, is republished for general information.

H. H. GREEN,  
Secy. to the Govt. of Bengal

No. 156—67, dated the 9th January 1914.

**RESOLUTION**—By the Government of India, Department of Commerce and Industry.

**MERCHANT SHIPPING.**

The following is published for general information—

**EXECUTIVE ORDER.**

*To provide Maritime Quarantine Regulations for the Canal Zone and the Harbours of the Cities of Panama and Colon, Republic of Panama.*

Whereas the official opening of the Panama Canal will require a revision of the maritime quarantine regulations of the Canal Zone and the harbours of the cities of Panama and Colon, Republic of Panama, and

Whereas the Government of the United States and the authorities of the Canal Zone are authorised to establish such rules and regulations for the ports and harbours of said cities, by virtue of the second paragraph of Article VII of the Treaty between the United States and the Republic of Panama for the construction of the Isthmian Canal, signed November 18, 1903, which paragraph reads, as follows—

“The Republic of Panama agrees that the cities of Panama and Colon shall comply in perpetuity with the sanitary ordinances, whether of a preventive or curative character, prescribed by the United States and in case the Government of Panama is unable or fails in its duty to enforce this compliance by the cities of Panama and Colon with the sanitary ordinances of the United States the Republic of Panama grants to the United States the right and authority to enforce the same;”

and section 6 of the Executive Order of December 3, 1904, known as the Taft Agreement made between the Secretary of War of the United States and the Chief Executive of the Republic of Panama, which section reads, as follows—

“Section 6.—This order also shall be imperative unless the proper Governmental authorities of the Republic of Panama shall grant power to the authorities of the Canal Zone to exercise immediate and complete jurisdiction in matters of sanitation and quarantine in the maritime waters of the ports of Panama and Colon;”

and Article I of Decree No. 26 of December 6, 1904, issued by the President of Panama, agreeably to said Executive Order, and published in the Official Gazette, No. 70 of 1904, which article reads, as follows—

**Article I.** The authorities of the Canal Zone are empowered to exercise freely, immediate and complete jurisdiction in all matters of sanitation and quarantine in the waters of the ports of Panama and Colon. In consequence the authorities of the Republic shall proceed in conformity with the provisions of this decree to the end that these may be strictly complied with.”

By virtue of the authority vested in me and in conformity with the foregoing treaty provision and the Executive Order and Presidential Decree

abovementioned, I hereby establish the following maritime quarantine regulations for the Canal Zone and for the harbours of the cities of Panama and Colon, Republic of Panama:

#### BILLS OF HEALTH.

**Section 1.**—Masters of vessels clearing from any foreign port or from any port in the possessions or other dependencies of the United States for a port in the Canal Zone or for the ports of Panama or Colon, Republic of Panama, must obtain an original bill of health in duplicate from the officer or officers authorized by the quarantine laws and regulations of the United States to sign such certificates for vessels entering the ports of the United States.

The following form is prescribed for such bills of health.

**Section 3.**—The master of a vessel entering the ports of the Canal Zone or the ports of Panama and Colon, Republic of Panama, from any port of the United States, must present to the Quarantine Officer and to the Customs Officer of the Canal Zone or his authorized agent each a bill of health signed by the Customs Officer of the port of the United States from which said vessel sails.

#### FOREIGN REGULATIONS.

**Inspection of vessels from Foreign Ports and Ports in the Dependencies of the United States.**

**Section 4.**—The officer issuing the bill of health shall satisfy himself, by inspection if necessary, that the conditions certified to therein are true, and is

authorized to withhold the bill of health or the supplemental bill of health until he is satisfied that the vessel, the passengers, the crew, and the cargo have complied with these regulations.

**Section 5.**—Inspection is required of:

(a) All vessels from ports in which cholera, yellow fever or plague in men or rodents prevails, or at which small-pox or typhus fever prevails in epidemic form, and at which a medical officer is detailed.

(b) All vessels carrying steerage passengers; but need only include the inspection of such passengers and their living apartments, if sailing from a healthy port.

(c) Inspection of the vessel is such an examination of the vessel, cargo passengers, crew, personal effects of same, including examination of manifests and other papers, food and water-supply, the ascertainment of its relations with the shore, the manner of loading and possibilities of invasion by rats and insects as will enable the inspecting officer to determine if these regulations have been complied with.

(d) When an inspection is required, it should be made by daylight, as late as practicable before sailing. The vessel should be inspected before the passengers go aboard, the passengers just before embarkation, and the crew on deck, and no communication should be had with the vessel after such inspection except by permission of the officer issuing the bill of health.

#### GENERAL REQUIREMENTS.

**Section 6.**—Vessels, prior to stowing cargo or receiving passengers, should be mechanically clean in all parts, especially the hold, fore-castle, and steerage.

**Section 7.**—Any portions of the vessel liable to have been infected by any communicable disease should be disinfected before the issuance of the bill of health.

**Section 8.**—Street sweepings, city cleanings, or anything containing organic refuse should not be taken as ballast from any port.

**Section 9.**—Bedding, upholstered furniture, soiled wearing apparel, personal effects, and second-hand articles of a similar nature, coming from a district known to be infected with cholera, small-pox, typhus fever, or as to the origin of which no positive evidence can be obtained, and which the consular or medical officer has reason to believe are infected, should be disinfected prior to shipment. In the case of typhus fever, the destruction of vermin should be assured. Articles similar to the above-mentioned, if from a district infected by plague should be inspected, and, if necessary, disinfected and treated to destroy vermin.

**Section 10.**—Articles from an uninfected district shipped through an infected port may be accepted without restriction if not exposed to infection in transit.

**Section 11.**—Any article shipped from or through an infected port or place, and which the consul or medical officer has reason to believe infected, should be disinfected.

**Section 12.**—Any article presumably infected, which cannot be disinfected, should not be shipped.

**Section 13.**—Passengers, for the purpose of these regulations, are divided into two classes, cabin and steerage. (a)

**Section 14.**—So far as possible passengers should avoid embarking at a port where quarantinable diseases prevail, and communication between the vessel and the shore should be reduced to a minimum. In such a port the personnel of the vessel should remain on board during their stay.

Vessels carrying passengers from any port where quarantinable diseases prevail in epidemic form should have a medical officer.

(a) The sanitary measures applicable to cabin passengers will be those designated for first class passengers or for steerage passengers, according to the arrangements of their quarters and accommodation aboard, both as regards food and ventilation, other than in the opinion of the inspecting officer with the first cabin or steerage.

**Section 15.**—No person suffering from a quarantinable disease, or scarlet fever, measles, diphtheria, or other communicable disease, should be allowed to ship.

**Section 16.**—All baggage of steerage passengers destined for the Canal Zone, or the ports of Panama or Colon, Republic of Panama, should be labelled. If the baggage is in good sanitary condition, the label shall be a red label bearing the name of the port, the vessel on which the baggage is to be carried, the word "Passed" in large type, the date of inspection, and the seal or stamp of the consular or medical officer of the United States. All baggage that has been disinfected shall bear a yellow label, upon which shall be printed the name of the port, the vessel upon which the baggage is to be carried, the word "Disinfected" in large type, the date of disinfection, and the seal or stamp of the consular or medical officer of the United States. It is understood, and it will be so printed on the blank, that the label is not valid unless bearing the consular or medical officer's stamp or seal.

**Section 17.**—Each steerage passenger shall be furnished with an inspection card, as follows. This card, stamped by the consular or medical officer, is to be issued to every member of a family as well as to the head thereof, and shall be in the following form:—

#### INSPECTION CARD.

(Immigrants and Steerage Passengers.)

Port of departure——. Date of departure——.  
Name of ship——. Last permanent residence——.  
Name of immigrant——.

Inspected and passed at (Seal or stamp of consular or medical officer).	Passed at quarantine, port of Canal Zone (or) Republic of Panama (Date.)	Vaccinated. (Signature or stamp.)
---	---	---

(The following to be filled in by ship's surgeon or agent prior to or after embarkation.)

(Ship's list or manifest - ———, No. on ship's list or manifest——).

Berth No.	STEAMSHIP INSPECTION.		To be punched by Ship's Surgeon at daily inspection.
	Days.		
	1st, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14		

**Section 18.**—Passengers and crews, merchandise and baggage, prior to shipment at a non-infected port, but coming from an infected locality, should be subject to the same restrictions as are imposed at an infected port.

#### LOCAL INSPECTION OF VESSELS.

**Section 19.**—Vessels arriving at any of the ports of the Canal Zone or the cities of Panama and Colon, Republic of Panama, under the following conditions, shall be inspected by the quarantine officer of the port prior to entry:

(a) Vessels from the United States; (b) vessels from foreign ports; (c) vessels with sickness aboard; (d) vessels from Panamanian ports where any quarantinable disease prevails; (e) vessels from Panamanian ports carrying passengers or articles suspected by the quarantine officer as being capable of conveying the infection of a transmissible disease.

**Section 20.**—The limits of anchorage of vessels awaiting inspection and of vessels undergoing quarantine, shall be fixed from time to time by the Chief Sanitary Officer of the Canal Zone.

**Section 21.**—Every vessel subject to quarantine inspection shall be considered in quarantine until granted free pratique, and such vessels shall fly a yellow flag from the foremast head from sunrise to sunset and shall observe all the other requirements of vessels actually quarantined.

**Section 22.**—The captain or master of a vessel in quarantine shall allow no communication with his vessel except as provided for in these regulations, nor shall any water craft approach within 200 meters of any such vessel.

**Section 23.**—No person or article shall be allowed to leave a vessel in quarantine without written authority from the quarantine officer.

**Section 24.**—Towboats, or any vessel or boat having had communication with a vessel in quarantine shall be submitted, with their personnel, to such measures of sanitation as the quarantine officer may judge to be necessary.

**Section 25.**—No person, except such officers of the port as are required to do so by the nature of their duties, and the agent of the vessel, if such agent has the consent of the quarantine officer, shall go aboard any vessel subject to quarantine until such vessel has been granted free pratique. Any person going aboard prior to the issuance of free pratique shall be subject to the same restrictions as the personnel of the vessel if, in the opinion of the quarantine officer, this is necessary for the protection of the public health.

**Section 26.**—The quarantine officer, after his inspection of the vessel and its documents, shall decide whether said vessel, or its personnel or passengers, or any article aboard said vessel is liable to convey any of the following diseases: Plague, yellow fever, cholera, small-pox, typhus fever, or leprosy; and if so, such vessel shall be placed in quarantine and forbidden entry until the period of incubation of such diseases is past, and he shall take such measures in respect to the vessel, its passengers or personnel or cargo as, in his judgment, may be required to prevent the entry of such diseases into the Canal Zone or the cities of Panama or Colon, Republic of Panama.

**Section 27.**—Passengers boarding vessels from ports subject to quarantine will be required, in the discretion of the Chief Sanitary Officer of the Canal Zone, to present personal certificates from the officer authorized by these regulations to sign bills of health, certifying to their sanitary history and condition, provided due notice has been issued to the agents of the steamship companies on the Isthmus of Panama.

**Section 28.**—Every case of sickness aboard any vessel in the harbour shall be immediately reported by the master of the vessel to the quarantine officer, who shall see the case and take such sanitary measures as may be necessary.

**Section 29.**—The Chief Quarantine Officer shall have charge of the sanitation of the harbours and vessels lying therein and shall see that such measures are enforced as are necessary for the proper hygiene of vessels, their cargoes, and their personnel, whether in port or en route, and to prevent the vessels from being a source of danger to other vessels or to the port, and he is authorized to certify bills of health to vessels clearing from ports under his jurisdiction, setting forth in such bill of health the conditions of the port, vessel, cargo, passengers and crew, and is authorized at the request of the master of any vessel to disinfect and otherwise place such vessel in a sanitary condition so that it may leave the port in free pratique and be able to make entry at the port of destination without further disinfection or detention in quarantine.

**Section 30.**—The quarantine officer shall make such charges for the disinfection of vessels and their cargoes, and for the transportation and subsistence of passengers while in quarantine as may be fixed from time to time by the Governor of the Canal Zone.

**Section 31.**—A certificate from the quarantine officer that a vessel has complied with all the quarantine regulations shall be required of every vessel subject to inspection, as a prerequisite for customs entry or passage through the Canal.

**Section 32.**—Quarantine stations shall be established and maintained at such places as may be decided upon by the Chief Sanitary Officer of the Canal Zone, with the approval of the Governor.

Persons detained in quarantine under these regulations shall not be permitted to go outside the limits of the quarantine station until discharged therefrom by the quarantine officer and if any such person shall leave the quarantine station without being duly discharged therefrom he may be taken into custody by the quarantine officers wherever found and returned to the quarantine station and, in addition, he may be punished as hereinafter described.

No person except the Chief Sanitary Officer of the Panama Canal or his representative, the quarantine officers and employes and personnel of the station shall be permitted to enter in or upon a quarantine station without permission from the Chief Sanitary Officer or the Chief Quarantine Officer of the Panama Canal.

**Section 33.**—The Governor of the Panama Canal may establish from time to time such rules and regulations as he may deem necessary to execute this order.

**Section 34.**—Any person violating any of the provisions of these regulations shall be punished by a fine not exceeding \$500, or by imprisonment in jail not exceeding 90 days, or both, at the discretion of the court.

**Section 35.**—The medical officers of the Canal Zone, duly clothed with authority to act as quarantine officers at any port or place within the Canal Zone and the ports of the cities of Panama and Colon, Republic of Panama, and when performing the said duties, are hereby authorized to administer oaths and take declarations thereunder in matters relating to the administration of the quarantine laws and regulations of the Canal Zone Government.

**Section 36.**—These regulations shall take effect from and after the date upon which the Panama Canal is officially and formally opened for use and operation, by proclamation of the President of the United States.

### MUNICIPAL AND LOCAL.

#### NOTIFICATIONS.

**No. 228 M.—The 23rd January 1914.**—In exercise of the power conferred by clause (a) of section 59 of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), the Governor in Council is pleased to approve the resolution passed by the Commissioners of the Jessore Municipality, in the district of Jessore, under section 23 of that Act, electing Babu Keshab Lal Ray Chaudhuri to be Chairman of that Municipality.

**No. 239 M.—The 26th January 1914.**—The following by-laws, made by the General Committee of the Calcutta Corporation, under clause (4) of section 559 and section 561 of the Calcutta Municipal Act, 1899 (Bengal Act III of 1899), in supersession of the by-laws published under notification No. 85 M., dated the 13th January 1908, at page 6 of Part I B of the *Calcutta Gazette* of the 15th *idem*, have been confirmed by the Corporation and sanctioned by the Governor in Council, in accordance with the provisions of section 566 of that Act, and are hereby published for general information in accordance with section 570 of the said Act:—

**BY-LAWS UNDER CLAUSE (4) OF SECTION 559 AND SECTION 561 OF THE CALCUTTA MUNICIPAL ACT, 1899 (BENGAL ACT III OF 1899), FOR SECURING THE EFFICIENT INSPECTION AND SANITARY REGULATION OF SHOPS IN WHICH ARTICLES INTENDED FOR HUMAN FOOD OR DRUGS ARE KEPT OR SOLD.**

1. Every shop-keeper in whose shop articles intended for human food or drugs are kept or sold, shall, at all reasonable times, afford the Chairman or such other officer as may be appointed by the Chairman in this behalf, free access to such shop for the purpose of inspection.

2. Every such shop-keeper shall carry out all requisitions and directions, made or given by the Chairman, or by such other officer as aforesaid, for providing adequate means of ventilation and access of light for his shop, for making the floors of such shop *pucca* and paving them with cement or other impervious material, for providing suitable drains for the shop, and for keeping it in a cleanly and wholesome condition.

3. Every shop-keeper who deals in drugs or prepared or manufactured articles of human food, shall provide in his shop such suitable receptacle or vessel as may be required for keeping such drugs or articles in such a manner as to prevent, as far as practicable, the risk of contamination from dust, ashes, rubbish, spiders, flies or other insects, or anything likely to affect them in such a way as to make them injurious to human health, and shall keep all such drugs or articles of food in such receptacle or vessel, and shall also keep and maintain such receptacle or vessel in a cleanly and wholesome condition to the satisfaction of the Chairman or such other officer as may be appointed by the Chairman in this behalf.

4. In the case of non-compliance with or breach of any of these by-laws, the Chairman may give notice in writing to the shop-keeper to comply therewith, or to discontinue such breach, within a reasonable time to be specified in such notice, and in default of compliance with the requirements of the notice, the Chairman may, by an order in writing, direct that the shop shall no longer be used for the keeping or sale of articles intended for human food or drugs until the Health Officer certifies in writing that the said requirements have been complied with.

5. A breach of any of these by-laws shall be punishable with fine which may extend to Rs. 20, and, in the case of a continuing breach, with fine which may extend to Rs. 10 for every day during which the breach continues after conviction for the first breach.

*No. 247M.—The 27th January 1914.*—Under rule 10 of the Rules under section 5 of the Local Authorities Loan Act, 1879, it is hereby notified, for general information, that His Excellency the Governor in Council intends to sanction the following application from the Hooghly-Chinsurah Municipality for a loan of Rs. 63,000 from Government, bearing interest at the rate of 4 per cent. per annum, and repayable in forty equal half-yearly instalments of Rs. 2,302-15-11 each, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality.

H. F. SAMMAN,  
Sery. to the Govt. of Bengal.

In addition to the details required on the reverse, clear information should be given below under the following heads:—

- (a) If the ordinary surplus is insufficient to meet the charges of the proposed loan, the particular steps which the borrowing body has taken, or has agreed to take in order to make good the deficiency.
- The ordinary surplus is not sufficient to meet the charges of the proposed and the previous loans. The charges on account of this loan and the loan of Rs. 1,12,000 already taken from Government will be met from the estimated receipts (Rs. 30,000) from water-rate after meeting the annual maintenance charge.
- (b) The reserve of taxation or other possible means of increase in the revenue of the local body.
- Water-rate.
- (c) A statement of all outstanding loans as well as the annual charges involved on their account.
- A loan of Rs. 40,000 was taken from Government in 1908-09 and 1909-10 for road works. The loan is being repaid now. The outstanding balance at present is Rs. 27,761-3-8. The annual charge for the repayment of this loan is Rs. 1,802-6-4 which is met from the ordinary income of the Municipality.
- Another loan of Rs. 1,12,000 for the water-works scheme was taken from Government during 1912-13. The repayment has not yet commenced. It will commence from 1st August 1913. The annual charge for the repayment of this loan is Rs. 8,188-7-8.

**No. 241 L.S.-G.—The 27th January 1914.**—The following draft of by-laws which have been framed by the District Board of Dacca, under section 139 of the Bengal Local Self-Government Act, 1885 (Bengal Act III of 1885), and which the Governor in Council proposes to confirm under clause (2) of the said section, is published for the information of persons likely to be affected thereby.

2. The draft will be taken into consideration on the 1st March 1914, and any objection or suggestion received by the undersigned, through the Magistrate, before that date will be duly considered :—

## DRAFT BY-LAWS FOR THE DISTRICT BOARD OF DACCA.

### *Definitions.*

1. In these bye-laws, unless there is anything repugnant in the subject or context,—

(1) the word "cattle" has the same meaning as in the Cattle-trespass Act, 1871;

(2) "reserved tank or well" means a tank or well which the District Board has set apart under section 90 of the Bengal Local Self-Government Act of 1885, by public notice, for the supply of water for drinking and for culinary purposes, and includes any reservoir, or part of any river, *khal* or other channel, so set apart; and a notice-board on the edge of a reserved tank or well, containing the words "reserved tank" or "reserved well," or words to that effect, shall be deemed to be sufficient notice for the purpose of this definition; and

(3) the "slopes" of a reserved tank or well include all places from which water can flow directly into such tank or well; and

(4) "road" means a road vested in, or under the control and administration of, the District Board or a Local Board; and includes—

(a) a village road;

(b) the slope, berm, borrow-pits and side-drains of a road; and

(c) all land vested in, or under the control and administration of, the District Board or a Local Board and attached to a road.

### *Roads, Drains, Bridges, Canals and Embankments.*

Encroachment or obstruction on a road.

2. (1) No person shall encroach on any part of a road by cultivating crops thereon.

(2) No person shall, on any road, by means of any building, fence, pit, embankment or ditch, or any other obstruction, or by means of any cut, drain or water-course intended for the purpose of drainage or irrigation, or by exposing thereon any goods for sale or by placing thereon any substance or material,—

(a) without the permission of the Chairman or Vice-Chairman of the District Board or a Local Board, or the District Engineer, make or cause any encroachment, or

(b) obstruct traffic, or

(c) cause any inconvenience to passengers, or

(d) hinder or impede the flow of water.

3. No person shall expose or place any article for sale in any bazar or market in the vicinity of any road, or collect or gather any articles in the vicinity of a road, so as to interfere with the traffic of the road.

4. Any person in possession of, or having control over, any plants, trees or hedges which obstruct, overhang, or overshadow any road, or any public drain or sluice, or any drain which is connected with a public drain, shall, if so required by notice in writing, signed by the Chairman or Vice-Chairman of the District Board or a Local Board, or by the District Engineer, cut down, prune or trim such plants, trees or hedges, within the period, and in the manner, prescribed in such notice.

5. (1) No person shall destroy or damage, or cause to be destroyed or damaged, any bridge, culvert or causeway, built on or across any road.

(2) No person shall erect any fence or other object on, or before or close to the opening of, any such bridge, culvert or causeway for the purpose of fishing or for any other purpose, so as to impede the free flow of water thereunder, or so as to cause damage thereto.

(3) No person shall cast nets for fishing purposes from any parapet of any such bridge or culvert.

6. No person shall—

(a) destroy or damage or cause to be destroyed or damaged, any fence

or post erected on any road; or

(b) dig, scrape, uproot or remove any soil, turf or grass from any part of a road.

7. (1) No person shall cut a channel, or convey water by a channel, across a road, except with the permission of the Chairman or Vice-Chairman of the District Board or a Local Board, or the District Engineer, and in such manner as he may prescribe.

(2) Any person who has been permitted by the Chairman or Vice-Chairman of the District Board or a Local Board, or by the District Engineer to cut a channel across a road, shall, at the time prescribed by him, cover or refill the channel so as to restore the road to its former condition.

(3) Any person who has a prescriptive right to keep a channel open for carrying water across a road shall keep the channel in proper order, so as to prevent danger or inconvenience to the public.

8. No person shall obstruct any waterway adjoining a road, so as to injure or tend to injure the road or otherwise to render the road impassable.

9. (1) No person shall make any excavation on any road, or any hole, pit, tank or well within fifteen feet of any road, without the permission of the Chairman or Vice-Chairman of the District Board or a Local Board or the District Engineer.

(2) Every person by whom, or by whose direction, any hole, pit, tank or well has been excavated within fifteen feet of a road shall be bound to take such order therewith as will prevent damage to, or erosion of, the road.

10. The owner or occupier of any tank, well or other excavation on or near the side of any road shall be bound to fence in or duly protect such excavation in such manner as may be directed by notice signed by the Chairman or Vice-Chairman of the District Board or a Local Board.

11. No person shall pass over, or drive any animal or vehicle over, any road, bridge, culvert or canal, so as to injure the same while it is under construction or repair or is affected by flood or is otherwise rendered unfit for traffic and is closed to traffic under the orders of the Chairman of the District Board or a Local Board, or (in emergent cases, pending application to such Chairman) of the District Engineer.

12. No person shall, without the permission of the Chairman or Vice-Chairman of the District Board or a Local Board, or the District Engineer, allow the rainfall from the roof of any building owned or occupied by him to be discharged upon any road by means of a spout or other thing intended for the conveyance of water.

13. No person shall allow the water of any privy, or any matter offensive or deleterious to health, to flow on any road.

**14.** Any person owning or possessing a tree or a house, wall or other erection which has fallen, or part of which has fallen, on to a road, shall, if so required by notice in writing signed by the Chairman or Vice-Chairman of the District Board or a Local Board or by the District Engineer, remove such tree, house, wall, erection or part, within the period prescribed in such notice.

**15.** No person shall cure hides on or within 50 feet of any road.

*Removal of trees or erections falling on to road.*

**16.** No person shall slaughter any animal, or clean any carcasses, or collect bones, on or within 50 feet of any road.

*Slaughter of animals, cleaning of carcasses, etc., on or near road.*

**17.** No person shall place or burn any corpse or the dead body of any animal on or within 50 feet of any road.

*Placing or burning of bodies on or near road.*

**18.** No person shall steep any hides or other offensive matter in any drain, borrow-pit or excavation at the side of any road.

*Steeping offensive matter in roadside drain, pit or excavation.*

*Flying kite on road.*

**19.** No person shall fly a kite on any road.

**20.** (1) Any person driving a vehicle along a road and meeting another vehicle shall keep on the left or near side of the road, so as to allow sufficient room for the other vehicle to pass.

(2) No person driving a vehicle along a road and overtaking another vehicle shall attempt to pass the latter vehicle otherwise than on the right or offside of the road.

**21.** No person shall prevent any other person from passing along a road, or shall otherwise interrupt the free use of a road.

*Freedom of roads.*

**22.** (1) No person in charge of, or having control over, any animal used for riding or draught shall allow such animal to stand or wander on any road without a rider or driver.

*Care of animals on road.*

(2) No person shall tether any cattle on, or within reach of, a road.

**23.** Every person owning, riding, driving or in charge of any elephant or camel proceeding on a road, must see that such elephant or camel is provided with a bell, and with a light also if such animal is proceeding on a road after nightfall.

*Elephants and camels on road to have bell.*

**24.** No person driving or in charge of an elephant shall take an elephant over a bridge or culvert vested in the District Board or a Local Board, unless the same be constructed of arched masonry.

*Taking elephants over bridge or culvert.*

**25.** Every driver of an elephant or camel shall, on being so required by the rider or driver of a horse, remove such elephant or camel with reasonable promptitude to a sufficient distance from the road, to allow such horse to pass safely along the road.

*Removal of elephants or camels from road to admit passage of horses.*

*Care of vehicles on road.*

**26.** (1) No person shall drive or have in his charge on any road more than one vehicle at a time.

(2) No person in charge of or having control over, any vehicle shall allow it to stand unattended on any road.

(3) No person shall leave a vehicle standing on a road for any longer time than is necessary for loading or unloading it.

(4) All owners and drivers of vehicles loaded with bricks or other materials shall be responsible for their being so secured that the contents thereof may not fall down on any road.

(5) If any vehicle breaks down on a road, the driver shall remove it to the edge of the road without delay, and shall, within a reasonable time, remove from the road all materials (if any) which have fallen from the vehicle, and shall place the vehicle in such a position that it will not obstruct traffic.

**27.** No person shall carry bamboo or bullahs on a cart on any road in such a manner as to scrape the road, or to cause injury or annoyance, or risk of injury, to travellers thereon.

*Carrying bamboo or bullahs on cart on road.*

28. Where separate tracks on roads have been set apart for carts and carriages, respectively, no cart shall be permitted to pass over the portion reserved for carriages.

Separate tracks for cart traffic and carriage traffic.

**State Sanskrit and Arabic Scholarships, 1914.****NOTIFICATION.**

IN accordance with the directions contained in paragraph 3 of the Government of India, Home Department, Resolution Nos. 731-743, dated the 1st September 1908, which is republished below, two scholarships—one for the scientific study of Sanskrit, and another for the scientific study of Arabic in Europe—will be awarded in the year 1914. The application of any candidates from Bengal should be submitted with the required particulars to the undersigned not later than the 1st of March 1914. No candidate will be considered who is not possessed of high qualifications and who is not a *bona fide* native of Bengal.

Application forms may be had from the Personal Assistant to the Director of Public Instruction, Bengal.

W. W. HORSELL.

*Director of Public Instruction, Bengal.*

CALCUTTA, the 9th January 1914.

Nos. 731-743, dated Simla, the 1st September 1908.

**RESOLUTION—**By the Government of India, Home Department.

THE Government of India have for some time past had under their consideration the question of encouraging the scientific study of Sanskrit and Arabic by natives of India. They believe that great advantage will result from aiding students to acquire the critical and scientific methods of western scholarship, by studying the classics under European Professors and by acquiring a knowledge of French and German which is indispensable for making full use of the researches of European Orientalists.

2. They have accordingly decided, with the sanction of the Secretary of State, to allot for the present four scholarships tenable in Europe—three for the study of Sanskrit and one for the study of Arabic. Not more than two will be awarded annually. The scholarships will be open to well-qualified students with a genuine taste for oriental studies and to gentlemen employed as Professors of Sanskrit and Arabic in India. The value of each scholarship will be £150 a year, and it will be tenable for two years. The Secretary of State will decide the courses of study of each scholarship-holder and the special conditions to be observed, if necessary, by students who elect to study in continental Europe rather than in England. A scholarship-holder will be provided with a free second-class passage to Europe, and also with a return passage if he completes the full period of residence or is compelled by sickness to return within that period. He will be required for disciplinary purposes to conform to such rules as the Secretary of State may make in this behalf.

3. In the first year one scholarship will be awarded for Sanskrit and one for Arabic. In the following year two scholarships for Sanskrit only will be awarded. Each Local Government or Administration is invited to submit, during the current financial year, the name of one candidate for a Sanskrit and one for an Arabic scholarship, and in the following year the names of two candidates for a Sanskrit scholarship, this procedure being followed in alternative years. It is requested that the names of the candidates may be accompanied by a full description of their qualifications, and with the views and recommendations of the Local Government thereon. The power of selection will rest with the Government of India, who will award the scholarships to those whom they may consider best fitted to hold them. Local Governments and Administrations are requested to submit their recommendations so as to reach the Government of India by the 31st March of each year at latest. Those for the current year should be sent in as soon as possible.

**ORDER.**—Ordered that a copy of this Resolution be communicated to the Government of Bengal for information and guidance.

## THE INDIAN LAW REPORTS.

PUBLISHED IN FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta, or

the Superintendent, Government Press, Madras, or

the Superintendent, Government Central Press, Bombay, or

the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.

## PART V.

Acts of the Governor General's Council assented to by the Governor General.

### GOVERNMENT OF INDIA. LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 16th January, 1914, and is hereby promulgated for general information :—

#### ACT No. I OF 1914.

*An Act further to amend the Code of Civil Procedure, 1908.*

WHEREAS it is expedient further to amend the Code of Civil Procedure, 1908 ; It is hereby enacted as follows :—

This Act may be called the Code of Civil Procedure (Amendment) Act, 1914.  
Short title.

2. To section 8 of the Code of Civil Procedure, 1908, (hereinafter referred to as "the said Code") the following provisos shall be added, namely :—

" Provided that—

(1) the High Courts of Judicature at Fort William, Madras and Bombay, as the case may be, may from time to time, by notification in the local official Gazette, direct that any such provisions not inconsistent with the express provisions of the Presidency Small Cause Courts Act, 1882, and

with such modifications and adaptations as may be specified in the notification, shall extend to suits or proceedings or any class of suits or proceedings in such Court.

(2) All rules heretofore made by any of the said High Courts under section 9 of the Presidency Small Cause Courts Act, 1882, shall be deemed to have been validly made."

3. Section 67 of the said Code shall be renumbered section 67 (1) and to the same section the following sub-section (2) shall be added, namely :—

"(2) When, on the date on which this Code came into operation in any local area, any special rules as to sale of land in execution of decrees were in force therein, the Local Government may, by notification in the local official Gazette, declare such rules to be in force, or may, with the previous sanction of the Governor General in Council, by a like notification, modify the same.

Every notification issued in the exercise of the powers conferred by this sub-section shall set out the rules so continued or modified."

W. H. VINCENT,  
Secretary to the Government of India.

*Offg. Chief Secy. to the Govt. of Bengal.*

#### NOTIFICATION.

#### EXAMINATIONS.

*Delhi, the 24th December 1913.*

No. 114.—In supersession of the Home Department Notification No. 336, dated the 23rd July 1909, the following revised Regulations under which a limited number of members of the Indian Civil Service, and officers of the Indian Army in civil or political employ (whether temporarily or permanently), will be permitted to present themselves for examination in the Russian language while on furlough are, with the approval of His Majesty's Secretary of State for India, published for information:—

1. The Civil Service Commissioners will hold examinations (Final and Preliminary) in London four times a year, commencing on the third Tuesday in January and October, the second Tuesday in June, and on that Tuesday in April which first follows after the date on which Easter Sunday falls. The names of the candidates to be examined must reach the Civil Service Commissioners at least one month before the date fixed for the commencement of the examination. The Preliminary examinations conducted by the Civil Service Commissioners will be held in London only and at the same times as the Final examinations.

2. The syllabus of the examination is as follows:—

#### PART I.—ORAL.

	Marks.
1. Conversation ... ..	60
2. Reading short M.S. reports, notes, telegrams, etc., and dictating answers thereto ... ..	20
3. Knowledge of terms relating to administration and Government, including the titles of local officials and the terms of etiquette in dealing with them, also of terms used in travel, to be tested by direct questions, and by oral translation ... ..	20
Total ... ..	100

## PART II.—WRITTEN.

	Marks.
4. Translation into English from Russian of unseen passages ... ..	20
5. Translation from English into Russian of unseen passages ... ..	30
6. Dictation ... ..	10
7. Translation into English of official and private correspondence (manuscript) ... ..	10
8. Writing a private or official letter in Russian, a <i>précis</i> being given ... ..	20
9. Extempore translation. A passage in Russian of an ordinary every-day style will be read aloud to the candidate, who will write down his translation of it ... ..	10
10. Extempore composition. An English passage of an ordinary every-day style will be read aloud to the candidate, who will write it down in Russian ... ..	20
Total ... ..	<u>120</u>

3. Officers who obtain '8 of the aggregate marks will be noted in their records of service as "1st class Interpreters" in Russian, and those who obtain '6 will be noted as "2nd class Interpreters."

4. Applications for permission to appear at these examinations must be made to the Government of India in the Department of Education at least three months before the dates of the examinations mentioned in rule 1—(a) in the case of an officer directly under the Government of India, through the Department in which he is serving; and (b) by an officer under a local Government or Administration, through the local Government or Administration to which he is subordinate. Applications must not be made to the India Office in London.

5. Such permission will be granted only to those members of the Indian Civil Service and officers of the Indian Army in civil or political employ who seem likely to be employed, before their active service comes to an end, in situations where a knowledge of Russian may be of advantage to the State, and to no one who will not be able to attend the preliminary examination, and also the final one, should he proceed to Russia for a course of study, and to return to duty in India, without exceeding the amount of leave which he may have to his credit or which may be admissible to him if subject to the Leave Rules for the Indian Army. The Government of India reserve to themselves full discretion to grant or withhold permission in any case.

6. Any officer, of not less than three and not more than twelve years' service, who proves his possession of a sufficient elementary knowledge of Russian by obtaining not less than '6 of the total marks at one of the preliminary examinations held by the Civil Service Commissioners, or passes one of the preliminary examinations in Russian held in India, will be permitted to proceed from England to Russia for a further course of study of the Russian language.

*Note.*—The syllabus of the preliminary examination is given in rule 19.

7. After passing the preliminary examination, and receiving permission to proceed to Russia, he must start from England within a fortnight from the date of the India Office letter conveying such permission unless specially authorised to defer his departure. He must on no account start for Russia until he has received a letter of instructions on the subject from the India Office. No officer on leave on medical certificate will be permitted to proceed to Russia under these rules unless reported fit to do so by the India Office Medical Board.

8. On starting for Russia he may be granted an advance of pay not exceeding 35 days' furlough pay and also not exceeding £100. Such advance will only be granted to an officer who draws his furlough pay from the India Office, and will be recovered in instalments spread over eight months after his arrival in Russia.

9. On his arrival in Russia, he shall report to the India Office his address and the date of his crossing the Russian frontier. Any subsequent change of his address shall likewise be reported.

10. Every officer permitted to go to Russia under these regulations is required to spend ten months in that country and to present himself for final examination at the first examination held after the end of these ten months.

11. Two months before his final examination, he shall notify to the India Office the address in England to which his order for examination should be sent by the Civil Service Commissioners.

12. On his return to England he shall report to the India Office in writing his arrival and the date of his crossing the Russian frontier on his return. If he left India on medical certificate, he shall apply for permission to appear before the Medical Board at the India Office. He shall not leave Russia, either temporarily or permanently, earlier than fourteen days before the final examination, without obtaining leave of absence for a definite period from the Under-Secretary of State for India.

13. If he succeeds at the final examination in qualifying to be a 1st class Interpreter in the Russian language, he shall receive a gratuity of £80 and if he qualifies as a 2nd class Interpreter under the same conditions he shall receive a gratuity of £40. He will also be granted travelling expenses\* from London to and from St. Petersburg or Moscow, as the case may be. The gratuities shall be paid only in cases where there has been the full term of residence in Russia for the purposes of study. He will also be granted a free passage from England to India unless granted leave on private affairs before returning to India (see paragraph 15) and will be treated with retrospective effect† as an entitled passenger to England or to Russia when first proceeding there. No grant on account of travelling expenses shall be made to an officer who fails to qualify to be an Interpreter, but he may earn the gratuity, travelling allowance, and passages (or payments in lieu) if he succeeds at any subsequent examination in qualifying to be an Interpreter, provided he has not more than 12 years' service at the time of re-examination.

14. An officer may re-qualify as a 1st class Interpreter after an interval of five years by passing the oral part of the examination together with an *extempore* translation from and into the language. The grant for re-qualification as a 1st class Interpreter will be one quarter of the grant for the original qualification.‡

15. Whether successful or not at the final examination, he shall rejoin in India within two months from the date on which it began, unless his leave or furlough extends beyond that period. If, however, his leave has been granted under medical certificate, it will be necessary for him as usual to obtain a certificate that he is in a fit state of health to return to his duty.

16. A member of the Indian Civil Service or a Military Officer subject to the Civil Leave Rules shall be entitled to count as Indian duty for promotion and pension, but not as service for furlough, the period of ten months spent in Russia. The whole time passed in the course of study and until the date of his return to duty in India will be treated as part of the furlough taken, and he will be entitled to the usual furlough pay.

17. A Military officer in civil employ, but subject to the Leave Rules for the Indian Army, shall be entitled to count as Indian duty for promotion and

\* Free first class railway and steamer accommodation and a travelling allowance, while travelling by rail or by steamer when the messing is not included in the cost of the ticket, at the rate of 15s. per night and 3s. 6d. for the last day. When the messing is included in the cost of the sea passage, this allowance is not admissible, but 3s. 6d. is allowed for the journey to the port of embarkation if the distance exceeds 10 miles, and 6s. if the journey necessarily occupies over 10 hours.

† i.e., (1) If he came to England from India at his own expense, he will receive, as passage allowance at the authorised rate in respect of his voyage to England, and will be provided with a passage to India by the India Office; or, if he took a return ticket on leaving India, he may claim the amount paid for it.

(2) If he came to England from India as a non-entitled passenger on a transport, he will receive a refund of his messing charges and entitled passage to India.

(3) If he went from India direct to Russia, he will receive a single fare at the British India Steam Navigation Company's rate from the port of embarkation to Port Said and a sum of £30 or £32 in respect of his travelling expenses from that port to Moscow or St. Petersburg, as the case may be, travelling expenses from Moscow or St. Petersburg to London as in the above footnote and an entitled passage from England to India.

In any of the three cases he will be entitled to receive, after returning to India, his travelling expenses from his station to the port of embarkation before starting for England.

‡ NOTE.—The provisions of this rule do not apply to officers who qualified as interpreters under previous regulations.

pension the period spent in Russia, and to draw for such period the equivalent, at the privileged rate of exchange, of the Indian pay and allowances of his rank, and the half staff salary of his substantive appointment: provided that if the sterling amount be less than his leave pay under the Leave Rules for the Indian Army, then leave pay shall be allowed. He will be considered as on leave before arrival in Russia, and from the date of quitting Russia until he rejoins his appointment in India, under the conditions of Regulation 15. The period spent in Russia will not be considered as part of the two years' maximum absence from duty allowable under the Leaves Rules for the Indian Army.

18. When an officer who has qualified as an interpreter in Russian under these or previous rules is on leave in England, he may, with the sanction of the Secretary of State for India on the recommendation of the Government of India, be permitted to proceed to Russia to keep up his knowledge of the language: and provided that he remains in Russia at least two months, he will, on his return to London, receive travelling expenses to and from St. Petersburg or Moscow, at the case may be (see paragraph 13), and, if desired, he will have his leave extended by two months without prejudice to the advantages accruing under the rules relating to combined leave, if on combined leave.

Applications for this privilege should be submitted through the usual channel to reach the Government of India in the Department of Education by 1st December. Officers who have been duly selected but who subsequently desire to cancel their applications, or find they are for any reason unable to proceed to Russia, will be required to notify the fact without delay.

19. The half-yearly preliminary examinations in India are held in January on the third Tuesday and in June on the second Tuesday; and the names of the officers who are recommended by the Government of India for permission to proceed direct from India to Russia will be communicated to the India Office as soon as the result of the examination is known. The names of the officers who are finally selected will be communicated by the India Office to the Government of India, who will give authority to each officer to take up his residence in Russia, to which country he should proceed about May or November so as to be on the same footing as the officers of his batch who proceed from England. If more than 18 months have elapsed since an officer passed the preliminary examination he will be required to undergo a fresh examination before receiving permission to proceed to Russia.

The syllabus of the preliminary examination is given below.

COMPANIES.

*Delhi, the 17th January 1914.*

No. 542C.—The following rules which the Governor-General in Council proposes to issue under the provisions of the Indian Companies Act, 1913 (Act VII of 1913), are published for general information. It is proposed that the Rules shall come into force on the 1st day of April 1914.

In exercise of the powers conferred by section 151 of the Indian Companies Act, 1913 (VII of 1913), the Governor General in Council is pleased to make the following rules:—

1. These rules may be called the Indian Companies Rules, 1914.
2. In these rules,

- (1) the "Act" means the Indian Companies Act, 1913;
- (2) the "Schedule" means the Schedule hereto annexed;
- (3) the decision of the Registrar as to the meaning of the words "responsible officer" shall be final.

3. Copies of contracts required to be filed with the Registrar under section 104 of the Act shall be deemed to be duly verified if they are,

- (1) certified copies as defined in section 76 of the Evidence Act (I of 1872); or
- (2) certified by an affidavit of some responsible officer of the Company to be true copies.

4. A copy of an instrument by which a mortgage or charge is created or evidenced delivered to the Registrar for filing under section 109 of the Act, or a copy of a deed so delivered under section 110 of the Act, shall be deemed to be verified in the prescribed manner if it is,

- (1) a certified copy as defined in section 76 of the Evidence Act; or
- (2) certified by an affidavit of some responsible officer of the Company to be a true copy;

Provided that a copy of such an instrument or deed where the mortgage or charge comprises solely property situate outside British India shall be deemed to be so verified if it is certified to be a true copy under the seal of the Company or under the hand of some person interested therein otherwise than on behalf of the Company.

5. If any portion of any document required to be filed under the Act other than under section 277 thereof is not in the English language, a translation thereof, certified by a responsible officer of the Company to be correct, shall be furnished along with each copy deposited with the Registrar.

6. The following fees shall be payable for the registration of mortgages and charges, namely:—

Rs.

- (1) For registering under section 110 of the Act particulars of a series of debentures.  
Where the total amount secured by the whole series does not exceed Rs. 2,000 ... .. 5  
Where it exceeds Rs. 2,000 ... .. 10
- (2) For registering under section 112 (1) mortgages or charges created by a Company,  
Where the amount of the mortgage or charge does not exceed Rs. 2,000 ... .. 5  
Where it exceeds Rs. 2,000 ... .. 10
- (3) For inspection under section 112 (3) of the register of mortgages and charges ... .. 1
- (4) For registration under section 118 of the appointment of a Receiver ... .. 5

7. A copy of a document required to be filed with the Registrar under section 277 of the Act shall be deemed to be certified in the prescribed manner:—

Certification documents section 277 Act.

A. In the case of a company incorporated in a foreign country, if

- (1) duly certified as a true copy by an official of the Government to whose custody the original is committed, the signature or seal of such official being authenticated by any of the British officials mentioned in section 6 of the Commissioners of Oaths Act, 1889, 52 and 53 Vict., c. 10 or in any Act amending the same, or
- (2) duly certified as a true copy by a Notary of such foreign country, the certificate of the Notary being authenticated by any of the British officials mentioned in section 6 of the said Act or in any Act amending the same, or
- (3) duly certified as a true copy on oath by some officer of the Company before a person having authority to administer an oath as provided by section 3 of the said Act, the status of the person administering the oath being authenticated by any of the British officials mentioned in section 6 of the said Act, or in any Act amending the same.

B. In the case of a Company incorporated in any part of His Majesty's dominions, if it is—

- (1) duly certified as a true copy by an official of the Government to whose custody the original is committed, or
- (2) duly certified as a true copy by a Notary Public of such place, or
- (3) duly certified as a true copy on oath by some officer of the Company before some person having authority to administer an oath in such place.

8. Translations of documents required to be filed with the Registrar under section 277 of the Act shall be deemed to be certified as correct translations, if certified to be correct translations.

Certification translations section 277.

A. Where such translation is made out of British India by

- (1) an official having custody of the original, or
- (2) a Notary Public for the country or place where the Company is incorporated:

Provided that where the company is incorporated in a foreign country, the signature or seal of the person so certifying shall be authenticated in either case by any of the British officials mentioned in section 6 of the Commissioners of Oaths Act, 1889, 52 and 53 Vict., c. 10, or in any Act amending the same.

B. Where such translation is made within British India

- (1) by an Advocate, Attorney or pleader entitled to appear before the High Court, or
- (2) by an affidavit of some person having, in the opinion of the Registrar, a competent knowledge of the language of the original and of English.

9. The Governor General in Council may in any particular case, if he thinks fit and upon such conditions as he may prescribe, permit certified copies or translations though not certified in accordance with rules 7 and 8 to be filed with the Registrar.

Power of Govt General in Cc to relax rule 8.

10. Notice of any alteration which is required by section 277 (1) of the Act to be filed with the Registrar shall be so filed within one month after the date on which particulars of the alteration could in due course of post, and if despatched with due diligence, have been received by the Registrar from the place where the Company is incorporated.

Times for alterations of particulars under section 277.

11. The Governor General in Council further prescribes and directs that the forms in the Schedule or forms as near thereto as circumstances admit, shall be used in all matters to which these forms relate.

No. 13—71-13, dated Delhi, the 6th January 1914.

**RESOLUTION**—By the Government of India, Department of Commerce and Industry.

THE following information relative to the International Rubber Congress and Exhibition which will be held at Batavia (Java) in September 1914 is published for general information.

The Government of India have decided not to participate in the Exhibition.

#### INTERNATIONAL RUBBER CONGRESS AND EXHIBITION TO BE HELD AT BATAVIA (JAVA), SEPTEMBER 1914.

AN International Rubber Congress and Exhibition will be held at Batavia (Java) in 1914, the importance of which is not under-estimated in view of the fact that 250,000 acres are planted with rubber in the Netherlands East Indies, and that 2,249 tons of rubber were exported from the Indies in 1911. It is therefore obvious that the Dutch eastern possessions occupy an important position on the list of rubber-producing countries of the tropical East.

The excellent collection of exhibits from the Netherlands East Indies at the International Rubber Exhibitions held in London in 1906 and 1911 are sufficient guarantee that no pains will be spared to make the Batavia Congress and Exhibition a success.

The Congress and Exhibition will be held under the auspices of the Netherlands East Indian Government. H. R. H. The Prince Consort of the

Netherlands has honoured the undertaking with his Patronage, and the valuable support of His Excellency the Governor-General and of His Honour the Director of Agriculture, Commerce and Industry, is assured. The international importance of the Congress and Exhibition needs but little explanation. The amount of foreign capital invested in rubber-estates in the Netherlands East Indies amounts to £18,500,000, of which £14,922,490 British, £138,000 German, £800,000 American, and £2,500,000 Belgian.

The Congress will be of incalculable importance to all concerned with rubber-growing in the tropical East, as the views of well-known authorities on vital questions will most certainly throw light on many matters of consequence. Both Congress and Exhibition will be unique inasmuch as, being held in a rubber-producing country, rubber-yielding species will be planted in the Exhibition grounds, and rubber-estates in the vicinity of Batavia and elsewhere in the Indies can be visited.

Batavia, the capital of Java, is most favourably situated for the Congress and Exhibition. It is connected by regular steamship lines with Europe and all the important ports of the Straits Settlements, the Federated Malay States, India, Ceylon and other parts of the East.

The Municipality of Batavia has, in view of the great importance of the Exhibition, granted the loan of a large plot of land in the centre of the upper town, Weltevreden, within a few minutes' distance from the hotels, railway stations, and trams.

A very active interest is being taken in the undertaking by His Honour the Director of Agriculture, Commerce and Industry, the agricultural associations in the Netherlands Indies and all important commercial houses which have rubber interests. The decidedly augurs well for its success.

The object of the CONGRESS, which will be held from the 7th to the 12th September 1914, is the study of the scientific, economical, technical and commercial questions, which concern the rubber culture and industry. Well-known authorities will be invited to contribute dissertations, and the subjects which are best suited for the purpose will, after they have been reported upon, be brought into debate during the Congress. At the conclusion of the Congress the dissertations, the reports thereon and the reports of the debates will be printed.

A Congress Committee is charged with the preliminary arrangements in connection with the Congress, which will be divided into eight sections, viz. :—

- |                        |                         |
|------------------------|-------------------------|
| 1. Botany and Zoology. | 5. Working policy, etc. |
| 2. Climate and Soil.   | 6. Synthetic Rubber.    |
| 3. Culture and Crop.   | 7. Commerce, and        |
| 4. Preparation, etc.   | 8. Publications.        |

The Secretary of the Committee, Dr. C. J. J. VAN HALL, Buitenzorg (Java), will willingly supply any information desired concerning the Congress, a definite programme of which will shortly be issued.

The object of the Exhibition, which will be held from the 8th September to the 10th October 1914, is to show how the culture and preparation of rubber is conducted in the principal producing countries, so as to obtain an idea how this is done in various parts of the globe. The necessary attention will also be devoted to wild rubber species.

A separate Committee to the Congress Committee is charged with the preliminary arrangements in connection with the Exhibition, all correspondence concerning which should be addressed to the Secretary-General.

In order that those interested may become acquainted with manufactured rubber-goods, an exhibition of these will also be held. The manufactured goods exhibited may be offered for sale.

**Prizes and diplomas**, a list of which will be published later, will be offered. Governments, corporations, associations and private persons or firms will be permitted to offer special prizes for exhibits or, after consultation with the Committee, form special competitions in connection with the culture and preparation of rubber and to lay down, if desired, special conditions regarding such competitions.

**The Jury** will be international.

**Applications for space** should be made to the Secretary-General before February 1st, 1914. The application should mention the number of square metres floor area or wall area required.

Space will be allotted by the Committee.

Exhibitors will be permitted to erect their own buildings for the exposition of exhibits. The plans and designs of such buildings will, however, have to be approved of by the Committee.

No charge will be made for exhibits which will not occupy more than 5 square metres, excepting for tools and machinery, for which the tariff is 10 guilders per square metre wall area and 25 guilders per square metre floor area. For exhibits likely to occupy more than 5 square metres wall area or floor area there is a special tariff, which will be sent post free on application.

**Agreements** will be made with the railway companies and steamship lines for chief freight-rates, particulars of which can be obtained on application from the Secretary-General. Costs of transport are for account of the exhibitors. The Committee will attend, on request, to the receipt, transport to the Exhibition grounds and unpacking of exhibits, but will not accept any responsibility for damage which the goods may suffer during transport.

The Committee will also attend to the protection of the exhibits during the days of the Exhibition is open and will insure them free of charge against fire and burglary for the value declared by the exhibitors. The Government of the Netherlands Indies will exempt exhibits from the payment of customs duties.

All machinery for which motive power is required should be at the Exhibition grounds on or before July 10th, 1914. The Committee will take the necessary measures so that the erection of the machinery can be commenced on that date. The building material required will be on the spot, providing it is applied for before March 21st, 1914. All other exhibits must be on the spot on or before August 1st, 1914. Live plants and perishable goods can be received until September 1st, 1914.

Exhibitors are advised to attend personally to the arrangement of their exhibits within the space allotted to them. In the event of their not being able to do this, the Committee will attend to it free of charge. For the erection of machinery the services of an expert will be available, if required, for account however and at the responsibility of the exhibitors, who will be called upon to pay the cost of the building material used for the foundations.

**State Sanskrit and Arabic Scholarships, 1914.****NOTIFICATION.**

IN accordance with the directions contained in paragraph 3 of the Government of India, Home Department, Resolution Nos. 731-743, dated the 1st September 1908, which is republished below, two scholarships—one for the scientific study of Sanskrit, and another for the scientific study of Arabic in Europe—will be awarded in the year 1914. The application of any candidates from Bengal should be submitted with the required particulars to the undersigned not later than the 1st of March 1914. No candidate will be considered who is not possessed of high qualifications and who is not a *bond fide* native of Bengal.

Application forms may be had from the Personal Assistant to the Director of Public Instruction, Bengal.

W. W. HORNELL,

*Director of Public Instruction, Bengal.*

CALCUTTA, the 9th January 1914.

Nos. 731-743, dated Simla, the 1st September 1908.

**RESOLUTION—**By the Government of India, Home Department.

THE Government of India have for some time past had under their consideration the question of encouraging the scientific study of Sanskrit and Arabic by natives of India. They believe that great advantage will result from aiding students to acquire the critical and scientific methods of western scholarship, by studying the classics under European Professors and by acquiring a knowledge of French and German which is indispensable for making full use of the researches of European Orientalists.

2. They have accordingly decided, with the sanction of the Secretary of State, to allot for the present four scholarships tenable in Europe—three for the study of Sanskrit and one for the study of Arabic. Not more than two will be awarded annually. The scholarships will be open to well-qualified students with a genuine taste for oriental studies and to gentlemen employed as Professors of Sanskrit and Arabic in India. The value of each scholarship will be £150 a year, and it will be tenable for two years. The Secretary of State will decide the courses of study of each scholarship-holder and the special conditions to be observed, if necessary, by students who elect to study in continental Europe rather than in England. A scholarship-holder will be provided with a free second-class passage to Europe, and also with a return passage if he completes the full period of residence or is compelled by sickness to return within that period. He will be required for disciplinary purposes to conform to such rules as the Secretary of State may make in this behalf.

3. In the first year one scholarship will be awarded for Sanskrit and one for Arabic. In the following year two scholarships for Sanskrit only will be awarded. Each Local Government or Administration is invited to submit, during the current financial year, the name of one candidate for a Sanskrit and one for an Arabic scholarship, and in the following year the names of two candidates for a Sanskrit scholarship, this procedure being followed in alternative years. It is requested that the names of the candidates may be accompanied by a full description of their qualifications, and with the views and recommendations of the Local Government thereon. The power of selection will rest with the Government of India, who will award the scholarships to those whom they may consider best fitted to hold them. Local Governments and Administrations are requested to submit their recommendations so as to reach the Government of India by the 31st March of each year at latest. Those for the current year should be sent in as soon as possible.

**ORDER.**—Ordered that a copy of this Resolution be communicated to the Government of Bengal for information and guidance.

## NOTIFICATION.

### Post-Graduate Research Scholarships, 1914.

1. Three post-graduate Research scholarships of the monthly value of Rs. 100 each, and tenable for a maximum period of three years, but in the first instance for one year only, will be awarded early in the year 1914.

2. No candidate will be considered who has not passed the M.A., the M.Sc., the M.D., the D.L., or the Master in Engineering Examination of the Calcutta University in 1911, 1912 or 1913. Only those candidates will be considered who are possessed of high qualifications, who can give evidence of capacity for original research and who are *bona-fide* natives of the Presidency of Bengal.

3. Two of the scholarships will be awarded to candidates who propose to carry on original research in some scientific subject, such as Natural and Physical Science, Chemistry, Mathematical Science, etc. The other may be awarded to a candidate who undertakes research in some literary subject, such as a Language, Comparative Philology, Palæography, Epigraphy, Philosophy, History, Archæology, Anthropology, etc.; but no application for a scholarship for research in a literary subject will be considered unless a candidate not only shows evidence of capacity for the research proposed, but also makes it clear, by the programme which he submits, that he has thought out a definite course of enquiry. In the event of no suitable candidate for a literary research scholarship being forthcoming, all the scholarships may be awarded for scientific research and *vice versa*. Each applicant must state as definitely as possible the subject or branch of a subject in which he proposes to carry on investigations, and must also indicate the institution or institutions at, or in default, the circumstances or conditions under, which he proposes to work.

4. All applications must be submitted, through the head of the institution in which the candidate was last a student, so as to reach the undersigned on or before the 15th of February 1914.

5. Application forms may be had from the Personal Assistant, office of the Director of Public Instruction, Writers' Buildings, Calcutta.

W. W. HORNEILL,

*Director of Public Instruction, Bengal.*

## PART II.

### Advertisements.

#### LAND SALE NOTICE.

##### Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Murshidabad, will be put to sale locally at the estate in police-station Bharatpur, subdivision Kandī, district Murshidabad, at 12 noon on the 16th February 1914, corresponding to 4th Falgoun 1320 B.S.

The purchasers will be subject to the following conditions of sale :—

##### Conditions of sale.

- 1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by the Subdivisional Officer of Kandī at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him.
- 2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings, and by the laws in force ; and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the Revenue authorities.
- 3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.
- 4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

Bills introduced into the Council of the Governor General for making  
Laws and Regulations, or published under Rule 23.

GOVERNMENT OF INDIA.

### LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 9th January, 1914:—

#### No. 1 of 1914.

*A Bill to consolidate and amend the law relating to the grant of loans to Local Authorities.*

WHEREAS it is expedient to consolidate and amend the law relating to the borrowing powers of local authorities; It is hereby enacted as follows:—

Short title and extent. **1.** (1) This Act may be called The Local Authorities Loans Act, 1914.

(2) It extends to the whole of British India including the Sonthal Parganas.

[Section 3, Act XI of 1879.]

**2.** In this Act, "local authority" means any person legally entitled to the control or management of any local or municipal fund, or legally entitled to impose any cess, rate, duty or tax within any local area;

"funds," used with reference to any local authority, includes any local or municipal fund to the control or management of which such authority is legally entitled, and any cess, rate, duty, or tax which such authority is legally entitled to impose, and any property vested in such authority;

"prescribed" means prescribed by rules made under this Act; and

"work" includes a survey, whether incidental to any other work or not.

**3.** (1) A local authority may, subject to the borrowing powers prescribed conditions, borrow on the security of its funds or any portion thereof for any of the following purposes, namely:—

- (i) for the carrying out of any works which it is legally authorized to carry out, [Section Act XI of 1879.]
- (ii) the giving of relief and the establishment and maintenance of relief works in times of famine or scarcity, [Section Act XII of 1897.]
- (iii) the prevention of the outbreak or spread of any dangerous epidemic disease, [Id.]
- (iv) any measures which may be connected with or ancillary to any purposes specified in clauses (ii) and (iii), [Id.]
- (v) for the purpose of repaying money previously borrowed in accordance with law: [Cf. Sec 3, Act of 1904.]

Provided that nothing in clause (v) shall be deemed to empower a local authority to fix a period for the repayment of any money borrowed thereunder which, when the period fixed for the repayment of the money previously borrowed is taken into account, will exceed the maximum period fixed for the repayment of a loan by or under any enactment for the time being in force.

(2) Nothing in this section shall be deemed to authorize any local authority:—

- (a) to borrow or spend money for any purpose for which, under the law for the time being in force, it is not authorized to apply its funds, or

- (b) to borrow money by means of the issue of bills or promissory notes payable within any period not exceeding twelve months.

Power to Governor General in Council of to make rules.

4. (1) The Governor General in Council may make rules consistent with this Act as to—

- (i) the nature of the funds on the security of which money may be borrowed ;
- (ii) the works for which money may be borrowed ;
- (iii) the manner of making applications for permission to borrow money ;
- (iv) the inquiries to be made in relation to such loans, and the manner of conducting such inquiries ;
- (v) the cases and the forms in which particulars of applications and proceedings, and orders thereon, shall be published ;
- (vi) the cases in which the Local Government may make loans without the previous sanction of the Governor General in Council, and the cases in which such previous sanction must be obtained ;
- (vii) the cases in which the Local Government may authorize local authorities to take loans from persons other than the Local Government, and the cases in which the previous sanction of the Governor General must be obtained to such loans ;
- (viii) the manner of recording and enforcing the conditions on which money is to be borrowed ;
- (ix) the manner and time of making or raising loans ;
- (x) the inspection of any works carried out by means of loans ;
- (xi) the instalments, if any, by which loans shall be repaid, the interest to be charged on loans, and the manner and time of repaying loans and of paying the interest thereon ;
- (xii) the sum to be charged against the funds which are to form the security for the loan, as costs in effecting the loan ;
- (xiii) the attachment of such securities, and the manner of disposing of, or collecting them ;
- (xiv) the accounts to be kept in respect of loans ;
- (xv) the utilization of the unexpended balances of loans either in the reduction in any way of the debt of the local authority, or in carrying out any works which that authority is legally authorized to carry out ; and the sanction necessary to such utilization

and as to all other matters incidental to carrying this Act into effect

(2) The Governor General in Council may, subject to such conditions and restrictions as he thinks fit, delegate to a Local Government, or Local Governments generally, all or any of his rule-making powers.

(3) All rules made under this Act shall be published in the Gazette of India, if made by the Governor General in Council, or, if made by a Local Government in the exercise of a delegated power, in the local official Gazette ; and, on such publication, shall have effect as if enacted in this Act.

5. If any loan borrowed in accordance with the provisions of this Act, or any interest or costs due in respect thereof, is or are not repaid according to the conditions of the loan.

the Local Government, if itself the lender, may, and, if the Local Government is not the lender, shall, on the application of the lender, attach the funds on the security of which the loan was made. After such attachment, no person, except an officer appointed in this behalf by the Local Government, shall in any way deal with the attached funds ; but such officer may do all acts in respect thereof which the borrowers might have done if such attachment had not taken place, and may apply the proceeds in satisfaction of the loan and of all interests and costs due in respect thereof, and of all expenses caused by the attachment and subsequent proceedings :

Provided that no such attachment shall defeat or prejudice any debt for which the funds attached were previously pledged in accordance with law ; but all such prior charges shall be paid out of the proceeds of the funds before any part of the proceeds is applied to the satisfaction of a liability incurred under this Act.

6. (1) Subject to the provisions of section 26 of the Indian Paper Currency Act, 1910, the local authorities mentioned in Schedule I and any other local authority to which the Governor General in Council may, by notification in the Gazette of India, extend the provisions of this section, may, with the previous sanction of the Governor General in Council, borrow money by means of the issue of bills or promissory notes payable within any period, not exceeding twelve months, for any purpose for which such local authority may lawfully borrow money under any law for the time being in force :

11 of 1910.

Provided that the amount of the bills or promissory notes which may be so issued, shall not exceed, when the amount of the other moneys for the time being borrowed by such local authority is taken into account, the total amount which such local authority is empowered by law to borrow.

(2) The Governor General in Council may, by general or special order, regulate the conditions on which money may be borrowed or repaid under this section.

7. Except as provided by or under this Act, no local authority shall, for any purpose, borrow money upon, or otherwise charge, its funds ; and any contract otherwise made for that purpose after the passing of this Act shall be void :

[Section 8. Act XI of 1879.]

Provided that nothing herein contained shall be deemed—

- (a) to preclude any local authority from exercising the borrowing powers conferred on it by any special enactment now or hereafter in force ; or
- (b) to affect the power conferred on any local authority by any such enactment to charge its funds, by guaranteeing the payment of interest on money to be applied to any purpose to which the funds of the local authority can legally be applied.

8. The Secretary of State in Council shall be entitled to the remedy mentioned in section 5 for the recovery of any money lent by him to any local authority before the fifth day of September, 1871, and the interest due on such money.

9. The enactments mentioned in Schedule II are repealed to the extent specified in the fourth column thereof :

Provided that all applications, declarations, authorizations, attachments, loans and rules made under any of these enactments shall be deemed to have been made under this Act.

Repeals.

Application of Act to loans existing previous to the 5th of September, 1871.

## STATEMENT OF OBJECTS AND REASONS.

\*CERTAIN practical difficulties have arisen in the working of the Local Authorities Loans Act, 1879 (XI of 1879), and it is proposed to amend that Act so as—

- (1) To remove all doubts as to the competency of Port Officers to borrow under the Act.
- (2) To make it clear that in the case of loans raised under section 7 of the Act (*i.e.*, loans raised in the open market) the Government of India can—
  - (a) by rule delegate the power of sanction to Local Governments ;
  - (b) direct that the unexpended balances of such loans shall be applied in the reduction of the debt of the local authority concerned, or utilised in carrying out works which the local authority is legally authorised to carry out ;
  - (c) by rule delegate to Local Governments, subject to such conditions as the Governor General in Council may by rule impose, the power referred to in the preceding clause.
2. At the same time it is considered desirable to take this opportunity of consolidating existing Acts which relate to loans raised by Local Authorities.

Those Acts are as follows :—

- (1) The Local Authorities Loans Act of 1879 (XI of 1879) as amended by Act XV of 1885, Act I of 1905 and Act V of 1907. This is the general Act under which local authorities derive their ordinary borrowing powers.
- (2) The Local Authorities (Emergency) Loans Act, 1897 (XII of 1897), as amended by Act XI of 1912. This Act extended the scope of the general Act by enabling local authorities to borrow money for certain temporary emergencies, such as famine relief and the prevention of epidemic diseases.
- (3) The Local Authorities Loans Act, 1904 (III of 1904), as amended by Act VIII of 1908, which empowered certain of the more important local authorities in India (specified in the Schedule to the Act) to raise money by the issue of short-term bills repayable within twelve months. Opportunity was taken to embody in this Act a provision (section 3) enabling local authorities, under certain restrictions, to raise money in order to repay money previously borrowed.

3. These three Acts, together with their various amending Acts, have been consolidated in the draft Bill, and, if the latter becomes law, will disappear from the Statute-book. The amendments mentioned in paragraph 1 above have also been provided for in the following manner :—

*Amendment 1.* This is covered by the substitution of the words “any person” or the words “any body corporate, Municipal Committee, or other persons” in the present definition of local authority as given in section 3 of Act XI of 1879—see clause 2 of the Bill.

*Amendment 2 (a).* This has been provided for by clause 4 (I) (vii) of the Bill.

*Amendments 2 (b) & (c).* These have been provided for by clause 4 (I) (xv) of the Bill.

4. In addition to these amendments, opportunity has been taken to reconcile certain discrepancies and to effect certain simplifications in the existing law which are due to the fact that the Acts now in force have been passed at different times to deal with special circumstances. Apart from this the Bill makes no change of principle in the existing law, and, in particular, does not affect the borrowing powers conferred on any local authority by any special enactment.

## RESOLUTION ON THE REPORT OF THE DEPARTMENT OF AGRICULTURE, BENGAL, FOR THE YEAR ENDING 30TH JUNE 1913.

### REVENUE DEPARTMENT.

#### AGRICULTURE.

CALCUTTA, THE 19TH JANUARY 1914.

RESOLUTION—No. 615.

READ—

The Report of the Department of Agriculture, Bengal, for the year ending the 30th June 1913.

*Staff.*—Mr. J. R. Blackwood was in charge of the Department throughout the year. Mr. A. A. Meggitt as Agricultural Chemist worked both for this province and for Assam. Mr. G. P. Hector held the post of Economic Botanist and Mr. F. Smith that of Deputy Director of Agriculture. A serious check to the work of the Department was caused by the

on leave, owing to ill-health, of Mr. Finlow, the Fibre Expert. The Government of India were unable to supply any officer of the Imperial Department of Agriculture to take his place, and his work has been carried on, so far as possible, by Messrs. Meggitt and Hector in addition to their other duties.

Another year's experience has convinced the Governor in Council that the superior staff of the Department is inadequate to deal satisfactorily with the task of improving the agricultural conditions of this Presidency. The Government of India have already sanctioned the creation of a separate post of Agricultural Chemist for Bengal, and an application has been made for the services of a second Deputy Director of Agriculture. In the event of this appointment being sanctioned, it will be possible to make a considerable advance in the control and organization of agricultural work in the province, and in the dissemination of the results already achieved among the cultivating classes.

A scheme for the co-ordination of the subordinate establishment of the Agricultural service in the Eastern and Western parts of the province and for the constitution of regular Provincial and Subordinate Agricultural services is also under the consideration of Government. Meanwhile two new agricultural supervisors have been appointed on probation. Both of them are graduates in Agriculture—one of the University of Edinburgh and the other of the University of Cornell in the United States of America.

2. *Agricultural Education.*—There is no agricultural college in this Presidency, and it is reported that the number of students from this province in the College at Sabour in Bihar and Orissa is diminishing in spite of the facilities offered to them, mainly owing to the lack of definite prospects of employment open to persons who have undergone a course of higher agricultural training. This difficulty will to some extent diminish as the official Department of Agriculture expands, but it is regrettable that the opportunities now available for training in agriculture should be so little appreciated by the landholding and cultivating classes. In view of the scanty support extended to the Sabour College, the Governor in Council has for the present definitely abandoned the proposal that an agricultural college should be established in connection with the Dacca University, but the Director of Agriculture has been requested to consider, in consultation with the Director of Public Instruction, whether it would be possible to provide on the Dacca farm a short elementary course in practical agriculture for the sons of gentlemen. Meanwhile practical instruction is being given on all the farms, so far as possible, to apprentices who are subsequently appointed as fieldmen demonstrators.

The reports as to the scheme for nature study in primary schools are disappointing. Most of the schools are said to be still without a suitable garden, but some progress has been made in Jessore and Khulna, and it is hoped that the question will not be lost sight of by the Education Department, to whom the Director of Agriculture should render all the assistance in his power.

3. *Research and experiments at agricultural stations.*—The Governor in Council is glad to see that a fuller account has been given than in last year's report of the work done by the scientific officers of the Department. No new agricultural stations were opened during the year. At the six existing stations, the investigations previously in progress were continued, and in some cases definite results were obtained or indicated. The experiments made by the Fibre Expert in regard to the manurial requirements of jute suggest that by the use of bonemeal and lime, jute and mustard crops can be profitably grown on the same land in one year. Mr. Finlow's work on the classification of jute races has been continued; and though it is perhaps too early to expect definite results, the Governor in Council would have been glad to have a fuller account of the progress of the work. Mr. Meggitt's work on sugarcane has so far been very successful, and as a result of the soil treatment adopted, the outturn of cane has risen during the last five years from 10 to 30 tons per acre. The use of lime and bonemeal has had a remarkable effect on the fertility of the soil of the Dacca farm, particularly in the case of *rabi* crops, and it is hoped that the experiments, which will be continued for the full period of six years as originally contemplated, will yield definite results in regard to the residual value of manuring over a

number of years. Green manuring experiments have also been continued, and so far the cowpea has proved itself the most useful plant for this purpose. Mr. Hector's important botanical work in connection with the rice crop has shown that natural cross-fertilization takes place to a much greater extent than was at first supposed, and a few successful crosses have been obtained. Special attention is rightly being paid to the higher yielding varieties. A large amount of time has been devoted to the study of the *ufra* disease of paddy, which has appeared on a considerable scale in some of the deltaic districts of Eastern Bengal, and a full account of the work up to date is being published. It has been established that the disease is caused by an eelworm of the genus *Tylenchus*, allied to worms which cause well-known diseases of other cereals. The best remedy, so far discovered, appears to be the destruction of the worm, when in a passive condition after harvest, by burning the stubble. An attempt is being made to work out a feasible scheme for dealing with the evil, but the problem which is of the utmost importance to the welfare of the province is one of much difficulty. An excellent account is given in Appendix I of the Report of the work done in the minor agricultural stations in the Province, but indications are not wanting that the work requires to be systematised. This can best be secured by the personal supervision of the Director, who should, in close communication with his expert advisers, lay down the lines upon which work is to proceed in each farm and see that his orders are steadily and intelligently obeyed.

4. *Sericulture*.—The Silk Committee, consisting of the representatives of the principal silk firms in Bengal with the Director of Agriculture as President, continued to be in charge of silk operations in the Presidency. M. Lafont, the French Expert in Hybridisation, who was appointed for a term of three years, was unfortunately compelled to leave India on account of ill health at the end of January 1913 after having been little more than a year in the country. Another expert, M. Grangeon, who has had experience of silk work at Madagascar, has been appointed to succeed him and has recently taken up his duties. The scheme for the supply of pure seed, which was referred to in the resolution on last year's report, was considered at a special meeting of the Bengal Silk Committee held under the presidency of the Hon'ble Mr. P. C. Lyon, C.S.I., and it was decided to accept it as the basis of future work for the assistance of the silk industry in this province. The object is to establish gradually throughout the silk districts a sufficient number of central nurseries with rearing houses built in groups, from which pure seed cocoons will be supplied under Government supervision. In pursuance of this scheme, a number of the existing smaller nurseries were closed during the year, and steps have been taken to convert others of the smaller nurseries into enlarged and improved central nurseries with rearing houses complete. In the Malda district, land was acquired during the year for a new central nursery at Piasbari, and the establishment of another new nursery at Amriti in the same district is under consideration. The ultimate success of the scheme depends largely on the willingness of the cultivators to pay an adequate price for pure seed.

5. *Tobacco*.—The appendix to the report shows that remarkable results have been achieved at the Burirhat Farm in Rangpur in the growth of good class cigar tobacco, and that high prices have been obtained from cigar manufacturers in Madras and Trichinopoly. As, however, there is no local market for such tobacco, it is doubtful whether much practical benefit has resulted to the ordinary cultivators; and unless a connection can be established between them and the manufacturers in Southern India, it would seem advisable to restrict future operations mainly to the local varieties of tobacco, on which also useful work appears to have been done.

6. *The Rangpur Dairy Farm*.—An area of about 334 acres has been acquired at Rangpur with the object of establishing a mixed farm and throwing some light on the difficult problems connected with the breeding and maintenance of cattle in a highly cultivated tract. The increasing encroachment of cultivation on the pasture lands of the villages in the greater part of the province has attracted much attention recently, and the only feasible remedy from an economic point of view, which has so far been suggested, is the adoption of some form of mixed farming. In order to introduce this new departure, it will be necessary to show the ordinary

cultivator that successful agriculture depends upon attention being paid to his stock as well as to his crops. Possession of the farm lands at Rangpur was not obtained until the end of March, and only preliminary work could be carried out during the year, but the scheme will now be pushed on. If success is to be achieved, and definite results obtained, it will be necessary for the Director to pay the minutest attention to detail, and to avail himself of the best advice which he can procure both from agricultural and from veterinary experts.

7. *Demonstration work.*—A scheme for organising and improving the demonstration work of the Department is now under the consideration of Government. It is hoped eventually to have a demonstrator in every thana, working under the supervision of trained officers in each district. It will be some time before the scheme can be fully worked up to, as it will be necessary to train men for the work. An increase to the existing staff was sanctioned during the year, and there is now approximately one Government demonstrator in every subdivision in Eastern Bengal. Demonstrations in the use of bonemeal manure have aroused considerable interest in several districts, and it is reported that a number of zamindars are advancing money for the supply of bonemeal to their raiyats, on the understanding that the manure is to be used under the supervision of the Department. It is understood that accurate records of the results secured by the demonstrators are being maintained, and the Governor in Council hopes that full information on this point will be given in next year's report. Demonstrations of the cultivation of improved types of potatoes have also proved successful in some districts, and a beginning has been made with the introduction of improved methods of conserving cowdung manure. It is stated that a considerable amount of work has been done by the Government demonstrators in marking down the best stalks of jute and paddy for seed. There is undoubtedly a wide field for useful effort in this direction, as the process of seed selection is at present little understood by the ordinary cultivator, who is apt to use any seed indiscriminately and is naturally averse to reserving his best stalks for seed. At the same time, the work of seed selection must be carefully and intelligently done, if it is to be of any practical use. His Excellency in Council trusts therefore that it is being adequately supervised by competent persons, and that a full record is being maintained of the results achieved.

In Western Bengal, the work of demonstration is mainly in the hands of members of the Divisional and District Associations. Some of these gentlemen have achieved useful results, but there have also been many failures, some of which might apparently have been avoided if the Department had been in a position to afford a greater measure of advice and assistance. The task of supervising the whole of the demonstration work of the province is, however, too much for one Deputy Director, and cannot be fully overtaken until the appointment of a second Deputy Director with an adequate establishment is sanctioned. Meanwhile the Governor in Council trusts that the Director will do his best with the staff at his disposal to render all possible assistance and advice to those gentlemen, who have shown themselves willing to undertake practical work. Nothing can be more discouraging to the improvement of agricultural methods than to find the results of serious effort inconclusive or unsuccessful, and willing workers should not be allowed to divert their energies into unprofitable or unpractical channels. More use might be made of agricultural shows and fairs in this connection. Such gatherings are very popular in many places, and the opportunities thus afforded to the officers of the Agricultural Department should be fully utilised to get into touch with the cultivators and to disseminate useful and practical information amongst them. The mere exhibition of implements, seeds and manures and the delivery of lectures will have little effect unless they are followed by serious attempts to maintain touch with the cultivators who show themselves ready to undertake practical work in their fields. As soon as definite results have been obtained regarding seed selection, the use of bonemeal manure, and other improvements, they should be given the fullest publicity in the Agricultural Year Book and in the leaflets and other publications of the Department.

8. *The Jute Forecast.*—The experiment of basing the jute forecast on a detailed census made by the panchayats of the jute cultivation in each union was repeated during the year. The check of the panchayats' returns

was further organized, and though still incomplete, has undoubtedly enabled more trustworthy figures as to area to be published than was previously possible. The forecast for 1912 turned out to be approximately accurate. That for 1913 has been criticised as unduly pessimistic, but it is as yet too early to say whether these criticisms are justified. Further measures for improving the forecast and the methods of jute cultivation generally are now under the consideration of Government in consultation with the Jute Forecasts Committee of the Chamber of Commerce.

9. *Fisheries*.—Most useful work has been done during the year by Mr. T. Southwell, the Deputy Director of Fisheries, to whom the special acknowledgments of the Governor in Council are due for the vigour and ability with which he has carried on the duties of his Department. Knowledge of the habits of *hilsa* has been materially extended, and a survey is now in progress relating to the distribution of *hilsa* in the main rivers of this Province and of Bihar and Orissa, which is expected to yield definite results regarding the breeding habits of the fish. The investigation of carp culture has not yet led to any positive conclusions, but a good deal has been done to encourage the traffic in carp fry and to spread information regarding the causes which lead to unsuccessful results in breeding. Enquiries have also been begun into the breeding habits of other fresh-water fish of commercial importance. Propaganda work has been carried out among the fishermen at all the places visited by the Deputy Director and his staff, and considerable interest has been evinced. Leaflets in the vernacular dealing with fish culture in tanks and the transport and curing of fish have been widely distributed, and their contents verbally explained on every available opportunity. Finally, an investigation has been made into the fish requirements of the province, and Mr. Southwell is engaged upon the preparation of a scheme, which will shortly be made public, for the development of the marine and estuarine fisheries of this Presidency.

10. The report under review contains signs of progress in various directions. The valuable work being carried out by the scientific officers of the Department has reached a stage at which definite results appear to be in sight. Demonstration work is expanding, and the indications that the efforts of the Department are being appreciated by the cultivators are satisfactory. At the same time the Governor in Council is not entirely satisfied that the work of the different branches of the Department is sufficiently co-ordinated, or that the risks of its energies being dissipated on diffuse and indeterminate work are sufficiently appreciated. His Excellency in Council thinks that the time has now come when the Director should take stock of the situation in consultation with the scientific officers of the Department, carefully classify the experiments which have reached a stage at which results can be demonstrated, and settle the lines on which further experiments should be conducted. He should then, still in consultation with the experts, decide on the best methods of carrying out demonstration work, on the staff required for the work and on the training which should be given to the staff before they are sent out into the villages. For all this organisation the services of a second Deputy Director are urgently required, and the Governor in Council trusts that his appointment will not be long delayed. The recent awakening of public interest in agricultural problems in this Presidency affords strong ground for hope that any sound and well devised measures of improvement will receive every support from the more influential sections of the community, many of whom have already displayed their interest in practical ways. Public spirit of this kind deserves and should receive every encouragement, but its growth will only be stimulated if the Department concentrates its efforts on definite schemes, which have been fully tested and can be confidently recommended as likely to increase the well-being of those who are engaged in what is still the greatest industry of this country.

By order of the Governor in Council,

J. H. KERR,

Secy. to the Govt. of Bengal.

## DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Sugarcane Crop of Bengal,  
1913-14.

**NOTE.**—On an average of the five years ending 1911-12, the area under Sugarcane in Bengal represents some 10 per cent. of the total area under Sugarcane in British India.

**Character of the season.**—Since the issue of the preliminary forecast weather conditions in the eastern districts have generally been fair, but in the western part of the province high floods and excessive rainfall injuriously affected the growth of the crop.

**Acresage.**—The area planted with sugarcane this year is estimated to be 216,500 acres against 221,800 acres last year. The decrease is due to unfavourable weather at the time of planting.

**Outturn.**—From the Appendix attached to the report it will be seen that nine districts report a crop between 90 and 100 per cent., eleven districts between 80 and 88 per cent., and the rest between 60 and 75 per cent.

According to estimates of District Officers, the total outturn of the crop for the Province works out to 86 per cent. of the normal against 91 per cent. last year.

Taking  $35\frac{1}{2}$  maunds as the normal rate of cane *gur* per acre, the gross outturn for the Province is estimated at 4,856,100 cwts. against 5,261,300 cwts. last year.

**Other sources of gur.**—The total quantity of *gur* likely to be obtained from date palm juice is estimated at 1,947,000 cwts. and from palmyra palm at 29,700 cwts. The total quantity of *gur* in the Province from all sources this year is estimated at 6,832,800 cwts.

CALCUTTA,  
The 16th January 1914.

	Acres.	Acres.	Acres.				
24-Parganas ...	5,100	2,700	2,500	100	75	November ...	The outturn is below the normal owing to excessive rain at the early part of the season.
Nadia ...	7,500	6,800	6,100	92	92	Middle of November. Normal.	The decrease in area compared with last year is due to want of rain at the planting season. Owing to excessive rain afterwards the outturn is below the normal.
Murshidabad ...	2,500	2,300	2,300	92	75	Will commence by the latter part of February. Normal.	The weather has not been favourable. Owing to excessive rainfall and flood in July and August the plants were submerged in a considerable area, and those not damaged to a considerable extent.
Jessore ...	6,500	2,300	2,200	100	53	October-November.	The plants could not thrive well owing to excessive rainfall after planting. Hence the fall in outturn.
Khulna ...	1,500	1,300	1,300	100	100	End of September	The weather was favourable and there was no injury to the crop.
Burdwan ...	25,000	24,400	22,700	100	53	November. Early.	Excessive rainfall in August reduced the outturn.
Barham ...	8,000	9,000	7,000	92	75	January ...	There has been excessive rainfall since the preliminary forecast. The decrease in area compared with last year was due to unfavourable weather.
Bankura ...	15,000	11,000	10,500	92	92	Not yet begun ...	The weather was favourable in the beginning of the season, but afterwards some injury was caused by floods in the Damodar. Excessive rainfall in June is responsible for the fall in outturn.
Malda ...	3,000	3,000	3,000	100	80	Beginning of January. Normal.	The weather has not been favourable. About five acres of the crop was damaged by heavy rain and consequent flood in August.
Hoojaly ...	7,200	6,000	6,200	97	66	Beginning of January. Late.	Since the preliminary forecast the weather has not been favourable. Excessive rainfall caused injury to the crop when the plants were young.
Howrah ...	8,500	6,700	4,800	100	67	Not yet commenced.	The weather at the commencement was not favourable. Heavy rainfall and flood retarded the growth of the crop. The damage caused by the Damodar flood is estimated at four acres.
Basirhat ...	16,000	13,200	13,200	75	80	Middle of November. Normal.	The crop, flood and heavy rainfall in September and October did a little damage to the crop in the Nagraon subdivision, and in those Kanapore of the Nagraon subdivision the crop was damaged by wild pigs. Hence the outturn is below the normal.
Meerapur ...	25,000	22,200	22,500	81	84	Beginning of November. Normal.	
Jalpaiguri ...	5,300	4,700	4,300	85	81	October. Normal.	Owing to unfavourable weather in the Chakrabarti circle, the outturn is below the normal. In other places the weather was favourable.
Darjeeling ...	1,200	100	100	75	65	Not yet begun ...	Since the submission of the preliminary forecast excessive rainfall has been largely affecting the crop.
Rangpur ...	20,500	18,100	14,000	100	100	1st week of December. Normal.	The outturn is expected to be normal as the weather was favourable though some damage was caused to the crop in Nijpham by excessive rain.
Bogra ...	20,000	20,000	20,000	70	80	Middle of January. Normal.	There was a drought at the planting time and excessive rain afterwards. This is owing to the low outturn.

Pabna ...	10,000	10,000	10,000	100	95	January ...	The weather conditions from July to December and also in May and June just after planting were not as favourable as was expected. Hence the outturn is slightly below the normal.
Maida ...	200	200	200	100	90	Middle of October. Normal.	Increase in area was due to increased cultivation (owing to excessive rain the weather was not very favourable from July to September, but was favourable since then). The outturn is below the normal owing to excessive rainfall from July to September.
Dacca ...	21,100	15,900	17,600*	92	98	September. Normal.	The weather was not very favourable. The damage done by insects is 5 per cent. on the whole. Hence the outturn is below the normal.
Mymensingh ...	8,000	7,500	8,000	97	100	1st week of December. Normal.	The weather was reasonable. Slight injury was reported from Netrokona owing to flood.
Faridpur ...	5,000	5,300	5,300	83	83	Middle of November. Normal.	Since the submission of the preliminary forecast, the weather conditions were fair. The outturn is below the normal owing to unusually heavy and continuous rain in May and June.
Bakarganj ...	11,000	11,400	11,700	95	98	.....	An enquiry was made as to the actual area, and as a result some of the reporting agencies have reduced their area since the preliminary forecast. (Owing to flood in Nadar subdivision and to excessive rain in Pirospur subdivision the outturn is below the normal).
Chittagong ...	6,400	5,000	5,000	90	88	Middle of October. Normal.	Since the submission of the preliminary forecast, excessive rain caused some damage in some parts of the district. Hence the outturn is below the normal.
Tippera ...	4,000	4,000	4,000	95	95	November. Normal.	The weather was fair. The outturn is below the normal owing to unfavourable weather at the time of planting.
Noakhali ...	900	700	800	90	80	Beginning of October. Normal.	The weather at planting time was fair, but subsequent heavy rainfall affected the growth of the crop. Hence the fall in outturn.

## MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR DECEMBER 1913.

**I. Character of the season.**—During the second week of the month light to moderate rain fell all over the province. The rest of the month was almost without any rain. The fall for the whole month was slightly in excess of the normal in all the districts excepting the 24-Parganas, Midnapore, Hooghly, Bakarganj, Chittagong and Chittagong Hill Tracts. The usual rainfall statement is appended.

**II. Progress of agricultural operations.**—Harvesting of winter rice and some varieties of pulses was in progress throughout the month and was nearing completion in some districts. The transplanting of summer rice was also going on in places. In some of the Eastern Bengal districts the lands were being ploughed for jute and *aus* rice during the latter part of the month.

**III. State of standing crops.**—The condition of the standing *rabi* crops was on the whole good.

**IV. Prospects and probable outturn of harvests.**—The prospects of the spring crops were generally hopeful and a good outturn was expected.

**V. Damage to crops.**—No damage was done to the standing crops by insect-pests or any other natural causes during the month.

**VI. Condition of agricultural stock.**—The condition of agricultural stock was reported to be fair. Cattle-disease was found to be prevalent in parts of the districts of Nadia, Burdwan, Birbhum, Bankura, Malda, Mymensingh, Chittagong, Noakhali and Chittagong Hill Tracts.

**VII. Failure of pasturage.**—Fodder was reported to be insufficient in parts of Midnapore only.

**VIII. Price of food-grains.**—During the second fortnight of the month under review the price of common rice rose in four districts only, fell in eight districts and remained stationary in the rest. It varied from 6 seers 6 chitaks per rupee at Mymensingh to 10½ seers at Bankura.

**IX. Condition of agricultural people.**—The condition of the agricultural population was reported to be fairly good. Gratuitous relief and agricultural loans were continued to those people of the Burdwan Division who had suffered from the floods.

**DISTRICT REPORTS ON WEATHER AND CROPS**

*For the week ending on the 19th January 1914.*

**Summary.**—During the week under report no rain fell throughout the province. Harvesting of winter rice and some varieties of pulses is nearly over. Lands are being prepared in some districts for autumn rice and jute. The condition and prospects of spring crops are good. The condition of agricultural stock is fair. Cattle-disease is reported from four districts. The average price of common rice has risen by about 0·3 per cent. as compared with that of the previous week. Agricultural loans and Government gratuitous relief continue to be granted in Midnapore.

## GENERAL DEPARTMENT.

### NOTIFICATIONS.

**No. 166.—The 12th January 1914.**—The services of Mr. E. Hoogewerf, Principal, Weaving Institute, Serampore, are placed at the disposal of the Assam Administration for a period of one month, with effect from the 25th January 1914, or any subsequent date on which he may be relieved of his duties at the Weaving Institute, Serampore.

**No. 169.—The 12th January 1914.**—Maulvi Bahar-ud-din Ahmad, Librarian, Dacca College, is allowed leave, under article 260 of the Civil Service Regulations, for two months and sixteen days, in extension of the leave already granted him.

**No. 171.—The 12th January 1914.**—Babu Dharendra Nath Ghosh, M.A., is appointed to act as Librarian, Dacca College, and in class VIII of the Provincial Educational Service, with effect from the 27th November 1913, *vice* Maulvi Bahar-ud-din Ahmad, on leave.

**No. 184.—The 12th January 1914.**—In the year 1903 His Majesty's Secretary of State for India sanctioned as a provisional measure the institution of a certain number of scholarships, tenable by natives of India, in Europe or America. The purpose of these scholarships was to provide for natives of India that higher technical education which might qualify them to assist in promoting existing native industries and developing new industries wherever this might be possible. Technical education for this purpose was defined as (a) the study of the scientific methods and principles underlying the practice of any handicraft, industry or profession, and (b) the application of these methods and principles to the handicraft, industry or profession in question. Law, medicine, civil engineering, forestry and veterinary science, being already provided for, were not included among the subjects to be studied by the holders of the technical scholarships, and agriculture was excluded from the scope of the scheme.

2. The Government of India have decided to award, during the year 1914, one scholarship to each province, provided that the Local Government or Administration concerned has a suitable candidate to nominate, and that its recommendation is submitted in accordance with the principles which are stated in paragraph 5 below, and that the industry to be studied is either already developed or in the process of development.

3. It may, however, happen that owing to the dearth of eligible candidates in certain provinces, two or more scholarships may on occasion be available for allotment to other provinces. If, therefore, a Local Government is in a position to recommend confidently more than one candidate, such recommendation may be submitted to the Government of India. In such cases the candidates need not necessarily be selected for the same industry.

4. As regards the current year, it has been decided, after consultation with representatives of the mercantile and industrial communities, that one candidate will, if possible, be recommended for a scholarship in connection with either Mechanical Engineering or Electrical Engineering. If a second scholarship is allotted to Bengal, a second candidate may be recommended in either of the subjects. The selection will depend largely on the character of the applications received.

5. The principles in accordance with which recommendations for scholarships will be submitted to the Government of India are as follow:—

- (a) In making selections Government will bear in mind the fact that it will be necessary for the students to have a competent knowledge of English, or of the language of any other country to which they may be sent.
- (b) Government will also be guided by considerations of the capacity and intelligence of applicants, and of the practical interest shown by them in the industries selected, as also the assurance which they may afford that they will continue to devote themselves to the industries selected on their return in India. These being matters which cannot be decided by competition, it is to be understood that the scholarships are not to be regarded as prizes, for which every one has a right to claim an equal opportunity of competing.
- (c) As a general rule, a scholar, before being nominated, should have received the best technical education available in the province in the particular industry which he proposes to study. The standard of this education differs in different industries, and each may be considered on its own merits. Even if the standard of technical education in a particular industry is low, the scholar may be nominated, if he has availed himself of the best facilities obtainable, and shown an interest in the industry selected.
- (d) No age-limit is fixed for scholars, but an age-limit may, at the discretion of Government, be fixed for any particular scholarship for which he invites applications.
- (e) No scholar shall be selected without passing a searching examination as to physical fitness to undertake the manual work which will be an essential part of his career.

6. The following are the conditions and terms on which the scholarships are tenable :—

- (a) The value of the scholarships has been fixed at £150 a year, exclusive of fees payable to the institutions where the scholars will study, and travelling expenses; but in special cases Government will consider proposals for increasing the amount of the scholarships.
- (b) In ordinary circumstances the period for which a scholarship is tenable will be two years, but in special cases it may be increased to a third year, or, on the other hand, it may be reduced below even two years.
- (c) The scholarships are tenable in foreign countries as well as in Great Britain, and are payable from the date on which a scholar reports his arrival in the country which he may have selected for the purpose of study.
- (d) The scholarships are tenable by persons who are natives of India within the meaning of section 6, Statutes 33 and 34 Vic., Cap. 3.
- (e) The scholars, while in England or elsewhere, will be under the supervision and control of the Educational Adviser of Indian students in London. The conditions under which they will hold the scholarships are given in the "Rules for Indian Government Technical Scholars in England," a copy of which is attached to this notification.

7. It is essential, not only in the interests of the scholars themselves, but also in order to avoid unnecessary extensions of scholarships, that the beginning of the period of the scholars' residence in England should coincide with the opening of the academical session of the institution which they propose to enter. It has accordingly been arranged, in consultation with the Secretary of State, that scholars shall report themselves in England not later than the middle of September. It has also been ascertained that it is of no advantage to them to reach England earlier than this, and that consequently they should not ordinarily leave India before the middle of August.

8. The special attention of candidates is invited to the fact that scholars must depend upon their own exertions when they return to India, and that the Government cannot, and does not, undertake to provide them with employment.

9. All applications for scholarships to be awarded during the year 1914 must reach the Director of Public Instruction on or before the 25th February 1914.

10. Applicants for scholarships must state their birthplace, age and father's name and occupation and file certificates as to (1) moral character and antecedents, (2) educational qualifications, (3) knowledge of the language of the country in which the scholarship is to be held, and (4) physical fitness. Candidates must name the country to which they propose to proceed and the course of studies which they propose to take up while in receipt of scholarships. They should also state whether they have had any actual experience of the industry or industries for which the scholarships are offered.

#### RULES FOR INDIAN GOVERNMENT TECHNICAL SCHOLARS IN ENGLAND.

1. The Secretary of State considers it desirable that all Government scholars should avail themselves of the information and advice which the Educational Adviser to Indian students is in a position to give them, and these rules are framed with that end in view. Government scholars, equally with private students, may consult the Educational Adviser upon any question, and will receive from him all possible assistance, and the Secretary of State hopes that they will communicate with the Educational Adviser, not only on the occasions when they are directed so to do in these rules, but also in any circumstances of difficulty and whenever they desire advice or information. Scholars will be regarded as being under the supervision and charge of the Educational Adviser, to whom they should in all cases address any communication they may have to make, and to whom also all

reports or other communications having reference to scholars should be sent. The Educational Adviser will bring to the notice of the Secretary of State on behalf of any scholar any question requiring his decision, and will communicate to the scholar the orders passed by the Secretary of State.

2. Every scholar should, on reaching England, at once call on the Educational Adviser\* and report his arrival in writing. He should leave his address with the Educational Adviser and intimate to him from time to time all changes therein.

3. Every scholar should, without unnecessary delay, inform the Educational Adviser to which University, College, or other Institution he is about to proceed, and should at once take steps to enter himself at the Institution finally selected with his approval.

4. Every scholar must, within four weeks of reaching England, submit to the Educational Adviser, for the approval of the Secretary of State, a statement showing the general course of study he proposes to follow to carry out the objects of the scholarship granted to him; and he should, during his first College term, submit a further statement showing as accurately as possible the details of the total cost of such course of study. This latter statement should in every case be prepared in consultation with the Principal of the College or Institution at which the student is entered.

The course approved must not be changed without the sanction of the Secretary of State.

5. Every scholar must give a written undertaking that he will devote himself exclusively, during the tenure of his scholarship, to the study of the subject for which his scholarship was granted, and that he will return to India on its termination, and there continue to devote himself to the industry which he has studied. Any scholar who neglects his studies, or tries to work for any other profession concurrently, will render himself liable to forfeiture of his scholarship.

6. Every scholar will be required to keep a concise daily diary, to be certified by the authority under whom he is working, and to be submitted at the end of each term through that authority to the Educational Adviser and to the Secretary of State for transmission to India. He must also submit, in the same way, from time to time, full notes of the work on which he is employed.

7. Scholars will be expected to continue their studies during the summer vacations of the Institutions where they are working, with the exception of three weeks in each year. Vacation study should, when possible, take the form of practical work.

8. Applications giving a detailed programme of the vacation work the scholar proposes to do, accompanied with a complete estimate of any extra expenses for fees and travelling, must be sent in through the Principal of the Institution or the Professor under whom the scholar is working before the end of the month of April. Scholars are not entitled to any subsistence allowance in addition to the scholarship allowance during time spent on vacation work, but a scholar who receives permission to visit the continent may, if the Secretary of State for India in Council considers that the circumstances render it desirable, be granted a subsistence allowance calculated at such rate as the Secretary of State may decide.

9. Every scholar must, at the end of each term of residence at a University or College, submit to the Educational Adviser a certificate from the proper University or College authority, showing that his residence, conduct, and progress in study have been satisfactory during the term.

10. Every scholar must at all times obey such instructions as he may receive from the Secretary of State, either directly or through the Educational Adviser.

11. Subject to a due compliance with the above conditions, the allowance, at the rate of £150 a year for two years, or three years if so determined, will be paid quarterly in advance, by the India Office, commencing from the date of the scholar's reporting his arrival in England. The first payment will be £37 10s. Three months after the date of reporting

\* The Educational Adviser's office is at 21, Cromwell Road, South Kensington, S.W.

arrival the amount of the ensuing official quarter day will be paid. Subsequent payments will be made in advance, on or after each official quarter day. The allowance will be reduced by the amount of any other sum which may become payable to him out of the revenues of India in respect of residence at a University, College or Institution during the same period or any part of it, but not in respect of University or College fees, the cost of which will be separately defrayed by the Secretary of State. Fees for private tuition are not defrayed by the Secretary of State unless previously sanctioned by him.

The necessary travelling expenses of scholars, by second class, or by third class if no second class be available, will also be separately defrayed by the Secretary of State; these should be claimed on forms obtainable from the Educational Adviser.

Deposits and other charges which are part of the regular fees exacted by the authorities of the educational establishment in which a scholar is working will be paid by the Secretary of State; but charges for books, instruments, hotel bills, and medical attendance must be paid by the scholar himself (any refund of a deposit must be repaid to the Secretary of State).

12. No claim can be admitted for the payment or refund of any expenditure unless the scholar has obtained the *previous* sanction of the Secretary of State for India to such expenditure. (This does not apply to necessary travelling expenses referred to above.)

13. Every scholar will forfeit his scholarship who, not being disabled by illness or prevented by any other cause which the Secretary of State may consider sufficient, fails to complete the required term of residence in England according to the terms and conditions approved by the Secretary of State under rule 4, or who is guilty of misconduct or disregard of the instructions of the Secretary of State. If a scholarship be forfeited, or if it be resigned before completion of its term, or if a scholar on completion of the term of his scholarship declines to return to India in accordance with the undertaking mentioned in rule 5, the scholar will lose his claim to a free return passage to India, and will further become liable to refund the cost of his free passage to England.

14. At the expiration of his scholarship a scholar is provided by the India Office with a free second class passage to India. The scholar is not entitled to make his own passage arrangements and to claim an allowance in lieu from the India Office without the special sanction of the Secretary of State. All communications on this subject are to be made to the Educational Adviser.

15. Should the Secretary of State be advised that the state of scholar's health is such as to render his return to India desirable, the scholarship may be terminated forthwith and a free return passage granted to the scholar.

H. L. STEPHENSON,  
*Secy. to the Govt. of Bengal.*

No. 252—268-C., dated Delhi, the 26th December 1913.

**RESOLUTION**—By the Government of India, Department of Commerce and Industry (Emigration).

INTIMATION has been received from His Britannic Majesty's Consul at Havana that labour conditions in Cuba are not suitable for Indians and that those who go to that country in the expectation of being able to proceed to other countries in that quarter find themselves prevented from doing so, either by the prevailing immigration regulations or by the undesirable character of the country.

The Governor-General in Council accordingly requests all Local Governments and Administrations to make the above intimation as widely known as possible, particularly in places from which emigration to Cuba is believed to be most common. Intending emigrants should also be warned at the ports of embarkation of the risks they run in proceeding to Cuba.

In addition to the details required on the reverse clear information should be given below under the following heads:—

(a) If the ordinary surplus is insufficient to meet the charges of the proposed loan, the particular steps which the borrowing body has taken or has agreed to take, in order to make good the deficiency.

(b) The reserve of taxation or other possible means of increase in the revenues of the local body.

(c) A statement of all outstanding loans as well as the annual charges involved on their account.

The ordinary surplus hitherto is not expected to meet the charges of loan. An increase of 2 annas per cent. in the rate of personal tax has been sanctioned.

No loan previous to this has been taken by this Municipality.

*No. 129 M.—The 13th January 1914.*—In exercise of the powers conferred by clauses (i) and (ii) of sub-section (1) of section 69 and by clause (2) of section 69B of the Bengal Municipal Act, 1884 (Bengal Act III of 1884), and in supersession of (a) the rules published with Bengal Government Notification No. 818T.M., dated the 13th September 1910, and subsequently amended by Notification No. 333T.M., dated the 23rd May 1911, and (b) the rules published with Eastern Bengal and Assam Government Notification No. 8778M., dated the 29th December 1908, the Governor in Council is pleased to make the following rules for the preparation, submission and execution of projects for water-supply, sewerage or drainage undertaken by municipal authorities:—

**RULES FOR THE PREPARATION, SUBMISSION AND EXECUTION OF PROJECTS FOR WATER-SUPPLY, SEWERAGE OR DRAINAGE BY MUNICIPAL AUTHORITIES.**

1. In these rules “municipal authority” means the Commissioners of a municipality constituted under the provisions of the Bengal Municipal Act, 1884.

*Definition.*

*Schemes and Projects.*

2. (1) Whenever a municipal authority desires to undertake a project for water-supply or sewerage or a comprehensive scheme of surface drainage, it shall first cause to be drawn up a sketch of the project roughly shewing its scope and approximate cost.

*Preparation of sketch of project.*

(2) Such sketch may be drawn up either by the Sanitary Engineer at the request of the municipal authority, or, subject to his supervision, by any firm or person approved by the Sanitary Engineer.

(3) The Sanitary Engineer shall, in all cases, act as adviser of the municipal authority.

3. (1) When the sketch of the project has been drawn up under rule 2 and it is estimated to cost Rs. 10,000 or more, or, in the case of an estimate of less than Rs. 10,000, if the financial assistance of Government is desired, the municipal authority shall submit it to the Sanitary Board through the Commissioner of the Division and the Sanitary Engineer, together with a statement wherein shall be shewn the amount of the funds available to meet the cost of the project either from current revenue or by way of loan or from any other source.

*Submission of sketch, statement and application.*

(2) If in the opinion of the Sanitary Engineer the scheme is unsatisfactory, or is submitted with insufficient information, or requires revision or alteration, the Sanitary Engineer may return the scheme to the municipal authority, with instructions to supply such additional information or to make such revision or alteration as the case may be.

(3) The Sanitary Board, after considering the project, shall forward it to the Municipal Department of Government for administrative approval with such recommendations as they may think fit.

(4) In the case of a scheme the total estimated cost of which is less than Rs. 10,000, not being part of a larger scheme or one for which financial assistance from Government is required, the administrative approval or final sanction of Government shall not be necessary; but the Sanitary Engineer must be consulted, and the scheme, with a copy of the Sanitary Engineer's opinion on it, must be submitted to the Commissioner of the Division for approval.

4. In order to obtain the administrative approval of Government to any project, the municipal authority shall satisfy Government—

*Conditions precedent to obtaining administrative approval of Government to a project.*

(1) that the cost of maintenance of the projected work can be met by the municipal

authority from revenue;

(2) that any loan required to meet the cost of the work can be repaid, together with the interest thereon within the period that may be prescribed by the Government; and

(3) that the work can be done effectually in the manner and for the cost proposed.

5. (1) When the administrative approval of Government or the Commissioner of the Division, as the case may be, has been obtained to any project and in no case before, the municipal authority may arrange for the preparation of detailed plans and estimates, and for this purpose may—

Procedure after grant of administrative approval. Preparation of detailed plans and estimates.

- (a) apply to Government in the Municipal Department for the services of the Sanitary Engineer; or
- (b) apply to Government in the Public Works Department for the services of their officers; or
- (c) with the previous sanction of the Sanitary Engineer—
  - (i) entrust the work to a private firm of established reputation; or
  - (ii) apply to the District Board for the services of the District Engineer; or
  - (iii) cause the plans and estimates to be prepared by one of its own officers or by an officer specially appointed for the purpose, subject in either case to the selection of such officer being approved of by the Sanitary Engineer who shall first satisfy himself that the officer is fully qualified for the work in question.

(2) In the cases of (b) and (c) referred to in sub-rule (1), the plans and estimates while in course of preparation shall be subject to the examination and control of the Sanitary Engineer.

6. (1) The plans and estimates shall, on completion, be forwarded in duplicate to the Sanitary Board, through the Commissioner of the Division and the Sanitary Engineer, together with a full report on the financial aspect of the scheme and the state of public feeling in regard to it, and, if a loan is required, with an application in the prescribed form.

Submission of detailed plans and estimates to Government through Sanitary Board for final sanction.

(2) In the case of drainage schemes the estimates must be submitted in Sanitary Board's Forms Nos. 21 and 22, copies of which may be obtained from the office of the Sanitary Engineer.

(3) When the scheme has not been prepared in the Sanitary Engineer's office, it shall be accompanied by full details of the calculations of the sizes and strength of the various works and complete information as to the prices on which the estimates have been framed.

(4) The Sanitary Board shall submit the scheme to the Municipal Department of Government for final sanction with an expression of their opinion on its merits as finally drawn up.

7. No work shall be commenced on the project nor shall any agreement be entered into until the detailed plans and estimates have received the final sanction of Government or of the Commissioner of the Division, as the case may be.

Commencement of work.

8. (1) Where the cost of the projected work is estimated to amount to Rs. 10,000 or more, adequate provision for detailed engineering supervision shall be a condition precedent to the grant of final sanction by the Government.

Conditions as to detailed engineering supervision.

(2) In the absence of special sanction to the contrary, the municipal authority shall agree to such one of the following conditions as may be considered suitable in each case—

- (a) that the work shall be carried out under the supervision of an Engineer specially employed for the purpose, assisted by an adequate establishment of properly qualified overseers, the name and qualifications of the Engineer having been previously submitted to the Sanitary Engineer and approved by him; or
- (b) that the work shall be carried out by the Public Works Department, if that Department can undertake it: in such cases an extra charge of 15 per cent. on the sanctioned estimates shall be made for supervision, unless the case is one of extraordinary difficulty, under which circumstances a higher charge may be imposed under the orders of Government; or
- (c) that with the previous approval of the Sanitary Engineer arrangements shall be made with the District Board for the carrying out of the work under the supervision of the District Engineer and his staff; or
- (d) that the work shall be carried out under the complete supervision or control of the Sanitary Engineer under an arrangement provided for in rule 9.

(3) In the cases of conditions (a) and (c) referred to in sub-rule (2), the work while in progress shall be subject to the inspection and control of the Sanitary Engineer.

9. (1) When requested by a municipal authority the Sanitary Engineer shall, if he considers that he can so arrange without detriment to the public service, take over the complete supervision and control of the work of construction of schemes of water-supply, sewerage or drainage undertaken by such authority on payment of the fees prescribed in rule 25.

(2) These fees shall cover the salaries and expenses of the necessary resident engineers, assistants, subordinates and menials, who may be appointed by the Sanitary Engineer, as well as the cost of a local office for the resident engineer, stationery and instruments and other incidental expenses incurred by the supervising staff.

10. Where the estimated cost of works amounts to less than Rs. 10,000, the municipal authority shall report, for the information of the Commissioner of the Division, the agency by which it is proposed to have such works carried out, and shall follow the instructions issued by him in the matter.

### *Tenders.*

11. When requested by the municipal authority the Sanitary Engineer shall prepare working or contract drawings, specifications, estimates, bills of quantities, forms of tender, or other documents or plans required for the execution of sanitary engineering works which have been duly sanctioned and which are to be let out by contract, as well as forms of advertisement inviting tenders for such works.

12. When drawings, specifications, bills of quantities, forms of tender, and other documents referred to in rule 11 are not prepared by the Sanitary Engineer, such drawings, specifications, etc., shall be submitted to the Sanitary Engineer for his approval in writing before tenders for the contract of such work are advertised for in the public press:

Provided that when such drawings, specifications, forms of tender, advertisements, etc., have been prepared by the Public Works Department, the approval of the Sanitary Engineer shall not be necessary.

13. Every advertisement for tenders shall briefly describe the works required to be carried out, the place or places where plans and drawings can be seen and copies of the specifications and forms of tender obtained, the deposit to be paid by any person making a tender, and the date and hour up to which tenders shall be received by the Chairman or the Vice-Chairman of the Municipal authority.

14. The plans, drawings, specifications, bills of quantities, forms of tender and advertisements shall be formally approved by the municipal authority in meeting. Whenever the said authority desires to make any alteration in any one of such documents, the Sanitary Engineer shall be informed and his advice obtained with regard to such alteration.

15. All tenders shall be submitted in sealed covers addressed to the Chairman or the Vice-Chairman of the municipal authority, and such officer shall attend in person at the office of that authority or at any other place to which it may be directed that tenders shall be forwarded at the latest hour specified in the advertisement for the receipt thereof. Any tender received after such hour shall be out of order and shall not be accepted.

16. The Chairman or the Vice-Chairman of the municipal authority shall himself open the tenders, shall number each tender and shall note thereon the exact time at which it was opened.

17. After the tenders have been opened, they shall be either—
- (a) sent to the Sanitary Engineer, or
  - (b) in the case of a municipal authority employing a permanently appointed, fully qualified whole-time Engineer, approved by the Sanitary Engineer as being competent to advise on these questions, handed to that officer for check and scrutiny:

Check and scrutiny of tenders.

Provided that in case (b) the Engineer of the municipal authority shall in case of difficulty or uncertainty consult the Sanitary Engineer.

18. The Sanitary Engineer, or the Engineer of the municipal authority, as the case may be, shall, after checking and scrutinising the tenders, return them to the Chairman with his remarks and recommendations.

Return of tenders to the Chairman after check and scrutiny.

19. The municipal authority shall thereafter consider the tenders in meeting, and either accept one of them provisionally or, if necessary or desirable, refer the question to the Sanitary Engineer for further advice.

Consideration of tenders.

20. No tender shall be accepted which is not in order, is not fully priced out and is not in every way in accordance with the instructions contained in the advertisement inviting such tenders. Any alteration or reduction in a tender made by the person making the tender after the same has once been submitted shall (except in the case of a palpable arithmetical error) at once render the tender out of order.

Acceptance of tender.

21. If it is found that none of the tenders submitted is satisfactory, or if for any reason it is believed that the conditions of tendering have not been properly understood, so that fair tenders have not been received, all such tenders shall be discharged and fresh tenders shall be advertised for.

Discharge of tenders and advertisement for fresh tenders.

22. After a tender has been provisionally accepted, it shall be submitted to the Sanitary Engineer for final approval, together with all other tenders received for the work, and until such approval has been received no tender shall be finally accepted by the municipal authority:

Provisional acceptance and submission of a tender to the Sanitary Engineer.

Provided that in the case of work to be carried out by the Public Works Department such approval shall not be necessary.

Provided also that in case the Sanitary Engineer disallows a tender accepted by the municipal authority, the matter shall be referred to the Chief Engineer, Roads and Buildings, if the municipal authority so desires, for final decision.

**IN THE HIGH COURT OF JUDICATURE AT FORT WILLIAM IN BENGAL.****ORDINARY ORIGINAL CIVIL JURISDICTION.**

**In the matter of the Indian Companies Act, 1882, and In the matter of Nodiha Coal Company, Limited, and Reduced.**

WHEREAS by a special resolution of the Nodiha Coal Company, Limited, and Reduced duly passed and confirmed in accordance with section 77 of the Indian Companies Act, 1882, at Extraordinary General Meetings of the Company held, respectively, on 26th day of November and on the 12th day of December 1913, it was resolved—

1. That the capital of the Company be reduced from Rs. 8,00,000, divided into 8,000 shares of Rs. 100 each to Rs. 4,00,000, divided into 8,000 shares of Rs. 50 each, and that such reduction should take effect as follows :—

- By extinguishing the liability of Rs. 25 per share in respect of the uncalled capital on each of the shares of the Company.
- By returning to the shareholders paid-up capital to the extent of Rs. 25 per share.

2. That the said 8,000 shares of Rs. 50 each be sub-divided into 40,000 shares of Rs. 10 each.

AND WHEREAS a Petition has been presented to the High Court of Judicature at Fort William in Bengal for the sanction of the reduction of capital as specified in the abovementioned special resolution in the manner and by the means therein specified, AND WHEREAS at the hearing of such Petition on the 5th day of January, it was ordered that the said Petition be placed on the list of causes for hearing on the 19th day of January 1914, and it was ordered that a Notice of such hearing be advertised in the "Englishman," "Statesman" and "Bengali" newspapers, and it was further ordered that the list of admitted creditors might be inspected in the office of the Registrar of the High Court of Judicature on payment of the usual charges, and it was further ordered that any person who should claim to have been on the 31st day of December 1913 or subsequently and still to be a creditor of the said Company and who should not be entered on the said list and should claim to be so entered must on the said 19th day of January instant bring in and file before the Honourable Mr. Justice Chitty at the hour of 11 o'clock in the forenoon full particulars of his claim or in default thereof he would be precluded from objecting to the proposed reduction of capital.

Notice is hereby given accordingly.

## RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE LAND REVENUE ADMINISTRATION OF THE PRESIDENCY OF BENGAL FOR THE YEAR 1912-13.

### REVENUE DEPARTMENT.

#### LAND REVENUE.

CALCUTTA, THE 10TH JANUARY 1914.

#### RESOLUTION—No. 229.

#### READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Presidency of Bengal for the year 1912-13.

THE Hon'ble Sir Duncan Macpherson, K.T., C.I.E., held charge of the office of Member of the Board from the 1st July to the 4th November 1912, and

from the 9th April to the 4th May 1913. Mr. E. W. Collin acted as Member from the 5th November 1912 to the 8th April 1913, and Mr. C. J. Stevenson-Moore, c.v.o., from the 5th May 1913 to the end of the year. In accordance with the Secretary of State's decision that, owing to the establishment of an Executive Council, the Board of Revenue in Bengal should consist of one Member only, the Bengal Board of Revenue Act, which was passed during the year, repealed the old laws of 1822 and 1850 relating to the Board, and legalised the new arrangement. A considerable portion of the Board's non-statutory functions has been transferred to Government.

2. *Land Revenue demands, collections, balances and remissions.*—The number of estates paying land revenue in this Presidency is 96,671, of which 91,458 are permanently settled and 3,001 temporarily settled, while 2,212 are managed direct by Government. The current demand of the year was Rs. 2,71,04,157, or Rs. 1,52,965 in excess of that of the previous year. The percentage of total collections on the total demand was 96·29, and on the current demand 100·03, the results being slightly better than in the previous year.

3. *Road and Public Works cesses.*—The current cess demand shows a decrease of Rs. 82,008, due chiefly to the revision of the assessment of coal mines in Burdwan, where the coal trade was dull during the first half of the year. The percentage of total collections on the current demand was satisfactory, being 101·4 as in the previous year. The general district average was good, 19 districts showing percentages of 100 or over.

During the year valuations or revaluations, partial or complete, were made in 16 out of the 25 districts to which the Act applies. A general revaluation was completed in Bogra, and fresh proceedings were initiated in Khulna and Dinajpur. The work is being carried on by the Settlement Department in Midnapore, Faridpur and Jalpaiguri. In consequence of complaints regarding the conduct of the revaluation in Bakarganj, a special enquiry was held, and the whole proceedings were set aside by the Board. A Deputy Collector has been appointed to check and revise the work.

In view of the decision to augment the resources of District Boards by surrendering to them the entire proceeds of the Public Works cess, legislation to amend the Cess Act will be necessary. The matter is now under the consideration of Government.

4. *Money-orders.*—The amount of land revenue and cesses remitted by money-order exceeded 17 lakhs, the average value of each remittance being Rs. 5-4. The system, which is a great convenience to small revenue-payers, is steadily extending. Further facilities will shortly be available, owing to the introduction of a combined money-order form for land revenue and cesses, which it is proposed to issue as soon as the reorganization of postal circles between the provinces of Bengal and Bihar and Orissa has been effected.

The system of payment of rent by money-order is in force throughout the Presidency, except in Darjeeling and the Chittagong Hill Tracts. There was a small decrease this year in the total number of rent money-orders issued and in the sum remitted, which, however, amounted to nearly 10 lakhs. There was a considerable increase in the percentage of cases in which money-orders were refused by landlords. The increase was most marked in the Rajshahi Division, and in Pabna more than three-quarters of the money-orders issued were refused. Some explanation of this remarkable figure might well have been furnished, and the statistics should be carefully watched by district officers, as a large number of refusals is an almost certain indication of the existence of disputes between landlord and tenant. It is reported that in some cases landlords refuse money-orders on the ground that acceptance will involve the recognition of transfers and prejudice their claims to enhancement of rent. There appears to be no ground for these apprehensions, but Government is considering the question of revising the money-order form, with a view to removing any reasonable objections which may exist on the part of landlords to the present form.

5. *Coercive measures.*—The revenue sale law was, as usual, administered with leniency and moderation. Although nearly 10,000 estates defaulted and were liable to sale, only 920 were actually sold. The number of certificates

filed, including those on cess accounts, was 128,868 as against 98,003 in the previous year. The increase was most marked in Faridpur, where it is ascribed to the issue of a large number of certificates by the settlement officer for the realization of survey and settlement costs. As a rule, the Settlement Department has been able to realize the greater part of these costs without resort to coercive measures, and the Director of Land Records, who is enquiring into the matter, will be asked to report why a different course was required in Faridpur. There was an unsatisfactory decrease in the number of certificate cases disposed of, and the number of long pending cases is very high in some districts. This matter should receive the special attention of Commissioners during their inspections. In the great majority of cases, payments were made on the issue of notices or on attachment of property, and it was necessary to resort to actual sale in only 2,347 cases, or 2·2 per cent. of the 106,447 cases disposed of during the year.

6. *Condition of the raiyats in Government estates and expenditure on improvements and education.*—The year was on the whole a prosperous one, and the condition of the tenants was satisfactory. The total number of estates under direct management was 2,212, with a current demand of Rs. 39,48,416. The expenditure on miscellaneous and sanitary improvements amounted to Rs. 1,10,551, of which more than half was devoted to drainage, irrigation and embankments. Rupees 59,796 was spent on education. There are now 2,262 schools, attended by nearly 75,000 pupils in the Government estates of the Presidency. The expenditure on roads and communications in Government estates was Rs. 1,64,124, of which Rs. 58,000 was paid out of the Government 1½ per cent. grant, the balance being met from local funds.

7. *Advances.*—As in the previous year, the demand for advances under the Land Improvement and Agriculturists' Loans Acts was small. It is satisfactory to note that considerable progress has been made with the realization of arrears, the amount overdue having been reduced from 2½ lakhs to a little over 1½ lakhs during the year.

8. *Drainage, irrigation and embankments.*—These operations are mainly confined to the Burdwan and Presidency Divisions. In the 24-Parganas, two sections of Magra Hât Drainage Scheme have been finished, and the third is approaching completion. The Nawi Sunti Drainage Scheme has been taken up under the Sanitary Drainage Act.

There were fortunately no heavy floods during the year, but considerable damage was caused in Birbhum owing to the neglected state of the private embankments. It is reported that many fertile tracts of land have been converted into sandy wastes, but that the zamindars, who are responsible for the maintenance of the embankments, are quite indifferent in the matter. Special investigations are now being conducted by the Public Works Department. Since the close of the year, disastrous floods have occurred in the Burdwan Division, causing considerable distress and damage.

9. *Partitions.*—One hundred and seven cases were instituted during the year, and 44 were disposed of, leaving 234 cases pending, including 171 cases which were pending at the end of the preceding year. Proposals for simplifying the procedure and expediting work under the Partition Act are under the consideration of the Board, but the subject is beset with difficulties, and it is reported that it will be some time before an amending Bill can be framed.

10. *Sundarbans.*—The rules for the grant of waste land leases in the 24-Parganas and Khulna portions of the Sundarbans continued to be held in abeyance, pending an investigation by the Public Works Department of the question of the effect of reclamation by embankments on the drainage of the tract. Excellent progress was made with the colonization of the Bakarganj Sundarbans, where 715 new colonists were settled on 54,586 bighas of land during the year. The Governor in Council agrees with the Board that the colonization officer deserves credit for these results, which indicate confidence on the part of the settlers in the revenue administration of the area.

11. *Working of the Tenancy Act.*—The reports regarding the working of the Tenancy Act contain little that is novel. Except in a few districts no

serious agrarian disputes came to notice, but the levy of *abwāb* and illegal cesses, and the failure to grant proper rent receipts, are still deplorably common. The Commissioner of the Dacca Division, in which the preparation of the record-of-rights is now approaching completion, remarks that the record is throwing light among those who sit in darkness and is becoming more and more the "people's charter." Apart from the record-of-rights, the functions of revenue officers under the Act are limited, but it is satisfactory to note the general improvement in the payment of landlords' fees due to the revised procedure prescribed by the amendments made in the Act a few years ago.

12. *Weather, crops, etc.*—The outturn of the principal crops was satisfactory in most parts of the province, and prices still ruled high, much to the benefit of the cultivators. The demand for all classes of labour was good, and the high wages paid compensated for the dearness of food-grains. Floods in June 1913 caused some distress in Birbhum, where a grant of Rs. 5,000 was made for the relief of the sufferers from Ram Lal Mukharji's Fund. A special grant of Rs. 10,000 was also made by Government for distribution in agricultural loans to the cultivators. There was renewed distress in the Chittagong Hill Tracts where the crops were damaged by an insect pest and to some extent by rats, before the people had time to recover from the scarcity of the previous year. In order to relieve the situation, the recovery of the agricultural loans issued in the previous year was suspended, and a further grant of Rs. 1,20,000 was made for distribution in loans to the people.

13. The thanks of Government are due to the Board for their capable and efficient administration of the Land Revenue Department during the year. The Governor in Council desires to take this opportunity of referring to the retirement of the Hon'ble Sir Duncan James Macpherson, K.T., C.I.E., who, during his service of thirty-five years, has taken a leading part in various capacities in the revenue administration, to which his long experience and untiring industry have been invaluable. His Excellency in Council is assured that Sir Duncan Macpherson will carry with him on his retirement the good wishes of all the revenue officers of this Presidency and their hearty congratulations on the honour which has been bestowed upon him at the close of his long career in India.

By order of the Governor in Council,

J. H. KERR,

*Secretary to the Government of Bengal.*

**NOTICE.**

**VISIT OF THE WEIGHTS AND MEASURES COMMITTEE.**

THE Committee that has been appointed to inquire into the advisability and possibility of prescribing a uniform system of weights and measures for the whole of India and Burma will arrive in Chittagong on the 18th February 1914 and leave for Bankipore on the 8th March 1914.

The whole Committee will sit as follows:—

Chittagong, February 18—20.  
Dacca and Narayanganj, February 23—24.  
Calcutta, March 2—5.  
Dinajpur, March 7.

Any persons interested in the subject of the Committee's inquiries who have not already been asked to appear before it are requested to intimate such desire to the Collector of one of the above districts at the head-quarters of which they wish to meet the Committee.

The Committee will also be very pleased to receive any written communications on the subject of their inquiries. All such communications should be addressed either to the Collector of one of the districts which the Committee will visit with a request that it be laid before the Committee or else to the President, *c-o* Post Master, Calcutta.

The following is a list of the questions issued by the Committee:—

*Questions.*

- N.B.*—(1) Please state your name, caste, address, profession, occupation or appointment, and if representative of a body, the name and address of the body represented.  
(2) Please reply to each question on a separate sheet of paper.  
(3) In answering the questions, please give, if practicable, the equivalents of the Indian weights and measures to which you refer in terms of any of those mentioned in the following tables:—

*Weights.*

180 grains is equal to	...	...	...	1 tola.
80 tolas	..	...	...	1 seer.
40 seers	..	...	...	1 maund.

(*Note.*—One rupee weighs one tola.)

*Lineal measures.*

12 inches is equal to	...	...	...	1 foot.
3 feet	..	...	...	1 yard.
100 links=22 yards is equal to	...	...	...	1 chain.
220 yards is equal to	...	...	...	1 furlong.
8 furlongs	..	...	...	1 mile.

*Area.*

Any of the above lineal measures, squared, or  
10 square chains (4,840 square yards) is equal to 1 acre.

*Cubical capacity.*

The approximate weight of water contained by the measure when full expressed in terms of any of the above weights.

1. What weights are in most general use in the neighbourhood with which you are acquainted?
2. What other weights are in use?

3. (a) Are different systems of weights (whether called by the same or different names) used in dealing with different commodities? *e.g.*, the maund for weighing firewood is in some places very different from that for weighing grain? Give full details of these weights and the commodities for which each is used.

(b) What are the reasons for their variations?

(c) What objection would there be to the adoption of a standard weight in these transactions?

4. Are different weights of the same name ever used in the same town or tract when purchasing and when selling the same articles? Give examples.

5. What measures of capacity are in use in the neighbourhood with which you are acquainted? Are they used heaped or struck?

6. How are the measures defined? If as containing some particular weight of some particular article, state weight and article.

7. What commodities are dealt with by these measures and under what circumstances? *e.g.*, are they only used in measuring out grain for sowing; or only by cultivators when selling their produce; or by villagers in making payments to village servants for customary services, etc.

8. Are different measures of the same name ever used in the same town or tract for buying and for selling the same article? Give examples.

9. Are the same commodities ever sold at the same place both by weight and by measure? Do you consider that this should be prohibited? If so, why?

10. Under section 3 of the Indian Weights and Measures of Capacity Act, 1871 (Act XXXI of 1871), the unit of weight is called a seer, but a seer is also a measure of capacity in many places.

(a) Does any confusion arise owing to the use of the same term to denote both a weight and a measure of capacity?

(b) Do you consider it preferable to confine the use of a term to designate either a weight or a measure of capacity but not both?

11. What measures of length are in use in the neighbourhood with which you are acquainted?

12. Are special measures of length used in dealing with special commodities? If so, give full details.

13. What measures of area are in use in the neighbourhood with which you are acquainted?

14. Does the measure of area of land ever vary according to the crop sown? If so, give full details.

15. Suggestions have been put forward that the United Kingdom should adopt the metrical system or some other uniform system of weights and measures based on the decimal or duodecimal system of notation.

(a) Do you consider it desirable that the introduction of a uniform system of weights and measures should be postponed until such a system is adopted and enforced in the United Kingdom and that the same system should then be introduced and enforced in India; or

(b) are you in favour of a uniform system of weights and measures being prescribed for all India; or

(c) do you consider that no attempt should be made to enforce the use of a uniform system of weights and measures in India? Please give full reasons for your opinion.

*N.B.*—Even though you are not in favour of a uniform system being prescribed, your replies to the following questions are requested on the assumption that a uniform system of weights and measures will be introduced.

16. Do you consider that weights and measures in force in other countries should be taken into consideration in determining the uniform system to be adopted for India.

17. There are two chief systems in use in the civilised world. The British is in use in the British territories and United States of America and the Metric system is used in most other countries except Russia. If a uniform system of weights and measures is to be introduced at once throughout India, should a system connected with either the British or the Metric system be adopted for India? If so, what system do you suggest? Please give full reasons for your suggestion.

18. If, however, you consider that a separate uniform system of weights and measures should be prescribed for India what would you suggest.

19. (a) Would it be advisable to prescribe in addition to the universal system for all India and Burma local standards corresponding as nearly as possible to some weight or measure in general use over some considerable area? (e.g., as the viss of 140 tolas for Burma). Name any such local standard you would consider it advisable to prescribe, giving reasons for your recommendations and the area over which such local standard should be permitted.

(b) Would it be advisable to allow some special weights to be used in special trades? If so, state what you would suggest with reasons.

(c) Should this be done temporarily or permanently?

20. What measures should be adopted to introduce and enforce the use of an authorized uniform system of weights and measures throughout India? The following suggestions have been made; please criticise and add to them:—

(a) The authorized weights and measures should be adopted in all transactions by Government, Railways and bodies controlled by Government.

(b) Specimens of the authorized weights and measures in general use should be supplied by Government to all Revenue offices in districts, all police-stations, all village headmen and all recognized elementary schools.

(c) Tables of the authorized weights and measures should be published as standing matter in the District Gazettes (village sheet) in the Vernaculars as well as in English; copies of the tables should also be kept by the village headman.

(d) The use of the authorized weights and measures should be taught in all recognized elementary schools and the use of no other weights and measures should be taught in such schools.

(e) The Government should stamp only authorized weights and measures.

(f) The Government should provide due facilities for stamping and verifying authorized weights and measures throughout the country. No fee should be charged for stamping authorized weights and measures for a certain period.

(g) The Government should replace free of cost by corresponding authorized weights and measures any weights and measures no longer authorized but stamped by or under the authority of Government before a certain date and still in good order.

(h) The Government should alter or make grants for the necessary alterations of weighing machines which are in British India at a certain date and in good order and in use or for sale.

(i) Only stamped authorized weights and measures should be used after a certain date in markets under the control of Government or any local authority.

(j) The import, manufacture and sale of other weights and measures should be declared illegal.

(k) No import duties should be levied for a certain period on authorized weights and measures and weighing machines for weighing authorized weights only.

(l) (i) The Government should sell at cost price authorized weights and measures.

*Note.*—This might discourage private trade in weights and measures.

or (ii) The Government should sell at Revenue offices at reasonable prices (so as to allow a profit to private trade) authorized weights and measures and simple weighing machines adapted for the authorized weights.

(m) After a certain date documents should be drawn up only in terms of the authorized weights and measures and civil courts should not recognize any other weights and measures in documents executed after the prescribed date. (An exception should be made in favour of documents relating to external trade with countries in which the authorized weights and measures are not recognized.)

- (ii) Documents drawn up after the prescribed date in terms of unauthorized weights or measures should not be registered in the offices of the Registration Department.
- (o) The use of any weights and measures except those authorized should be illegal throughout India after a certain date.

*Note.*—Your views are invited as to the length of the periods mentioned above, if the proposed measures are adopted.

- (p) It should be presumed that any unauthorized weights or measures found in the possession of a shop-keeper, trader or merchant are intended to be used and that such possession should be illegal.

21. What penalties should be prescribed for failure to adopt the prescribed system? What is your opinion on the suitability or otherwise of the following:—

- (a) Destruction (without confiscation) of unauthorized measures found in use contrary to law.
- (b) Confiscation of unauthorized weights and measures found in use contrary to law.
- (c) A fine on conviction before a Magistrate of using an unauthorized weight or measure contrary to law.

22. What authority should be employed to detect cases of unauthorized weights and measures? What are your views (with reasons) on the advisability and practicability of employing for this purpose—

- (a) The police.
- (b) The Revenue staff.
- (c) In municipalities and towns, the Municipal or Town staff.
- (d) Some other agency either paid or unpaid as, e.g., village headmen.

*Note.*—As regards (a), (b) and (c), please state the lowest grade of officer of each of these classes who should be empowered to detect cases.

23. In your opinion how would the introduction of a uniform system affect (a) large traders, (b) small traders, (c) others generally, especially agriculturists and the poorer classes.

24. Do you use any tables for the conversion of weights or measures? If so, where are copies procurable?

25. The Committee has been appointed to inquire into the whole question of the feasibility of securing the use of uniform weights and measures in India. Have you any further suggestions to make to the Committee?

C. A. SILBERRAD.

**RESOLUTION ON THE REPORT ON THE WORKING OF  
CO-OPERATIVE SOCIETIES IN BENGAL FOR THE  
YEAR 1912-13.**

**REVENUE DEPARTMENT.**

**AGRICULTURE.**

CALCUTTA, THE 13TH JANUARY 1914.

**RESOLUTION—No. 395 Agri.**

**READ—**

*The Report on the Working of Co-operative Societies in Bengal for the year 1912-13.*

THE report deals with the working of co-operative societies in the Presidency of Bengal during the year ending the 30th June 1913. Mr. Jamini Mohan Mitra held the post of Registrar throughout the year.

2. The report indicates further steady progress in the growth of the co-operative movement in Bengal. The number of societies rose during the year from 939 to 1,121, or by 19 per cent., and the number of members from 40,636 to 57,027, or by 40 per cent., while the working capital, excluding the value of grain, rose from Rs. 26,02,709 to Rs. 46,09,559, or by 77 per cent. This marked increase has occurred in spite of the Registrar's policy of concentrating his energies on consolidation and the readjustment and improvement of the machinery of finance and control, and it may now be regarded as an established fact that once this problem has been solved, there are no limits to the extension of which the movement is capable in this province. Meanwhile it is satisfactory to note the activity of successful central banks in creating new societies in their respective areas, and the fact that the working capital increased during the year in a much larger proportion than the number of societies or their membership, indicates that the progress made is on sound lines and that the individual societies were more effective economic institutions at the close of the year than they were at the beginning.

3. It is now generally recognized that the aim of the department in every area where the movement shows signs of expansion should be to create a central agency capable of providing adequately for the financing and supervision of societies. The Registrar's efforts in this direction during the year have resulted in an increase of effective central societies from 7 to 17, while the working capital employed on this branch of the work has more than doubled, and now amounts to nearly Rs. 14 lakhs. All of these societies are not equally efficient. Some of them rely too much on their paid officials or leave everything in the hands of one or two prominent members, but others evince the true co-operative spirit, and the work done by the directors and share-holders of several central unions in organizing and supervising rural societies is most valuable and encouraging. It is satisfactory also to find that only two of the societies are of the capitalist type, composed of individual share-holders, while most of the others are true co-operative unions consisting wholly or mainly of co-operative societies. The increasing recognition on the part of the unions of the necessity of making proper arrangements for the detailed supervision of the affiliated societies is also most gratifying, and several of the central banks are now meeting the whole cost of the paid staff required for this purpose. Development on these lines will go far to solve the difficult problems of organization and control, though until they are solved, a too rapid rate of progress is neither possible nor desirable.

4. Apart from inherent defects, which time and experience will remove, the main difficulty of the central unions is their lack of a fluid supply of capital. The Governor in Council has accepted the Registrar's view that the time has now come when the establishment of a provincial co-operative bank should be seriously considered. The Registrar has been requested to draw up a scheme in consultation with others interested in the movement, and, when ready, it will be submitted for the criticism and advice of the most competent authorities whose services Government can secure. There can be no doubt that, if a feasible scheme for a provincial bank can be devised, an enormous advance will be rendered possible.

5. Turning now to individual societies, it may be noted that the number of non-agricultural societies, formerly generally known as urban societies, has increased from 56 to 68, the membership from 8,445 to 11,945, and the working capital from Rs. 5 lakhs to over Rs. 9½ lakhs. The majority of these societies work on the principle of limited liability, and the absence of a true co-operative spirit is one of their weak points. Considerable improvement has however been effected by the introduction, during the year, of a statutory rule under the Act, limiting the dividends paid by the societies to 12½ per cent., and it is satisfactory to find that the rule has not caused any diminution in the number of societies. The urban societies have opened up to the poorer middle class a new source of credit, of which they can avail themselves without any loss of self-respect or permanent embarrassment, but they do not appear as yet to have done much to encourage saving among their members, and there seems to be a tendency on the part of some of the members to borrow more than they actually require for useful purposes. Many societies, however, limit the credit of individual members to a certain multiple of the shares held by them, and this rule must operate incidentally to encourage thrift.

6. The development of agricultural societies has again been most satisfactory, and the Governor in Council agrees with the Registrar that, as the Raiffeisen principle has proved itself thoroughly suitable to rural conditions in Bengal, there is no necessity to introduce innovations or to experiment with other types. The number of societies has increased during the year from 871 to 1,036, the membership from 30,756 to 42,553, and the working capital from Rs. 14,71,000 to Rs. 22,76,000. More important than these numerical increases are the indications that the movement is beginning to have some effect on the problem of agricultural indebtedness. It is reported that in some areas the societies, by providing a substitute for the village *mahajan*, have compelled the latter to improve his methods of business and to reduce exorbitant rates of interest, thus benefiting a much larger circle than that covered by the actual operations of the societies. Further interesting examples are given in the report of the effect of the village societies in strengthening the characters of their members and increasing their general well-being in other ways than by the mere supply of improved credit facilities. It has been shown that co-operative societies decrease litigation by inducing their members to submit petty disputes to arbitration. They raise the general tone of public opinion in other directions, and a most interesting development is the starting of village schools by societies, and the practice of giving regular contributions to other village institutions. The Registrar's report fully justifies his claim that, of all the movements hitherto set on foot for the moral and material improvement of the agricultural class, the co-operative movement is incomparably the most successful and promising, and as such deserves the full support of every member of the community.

7. Other important features of the year's work can only be briefly noticed. The summary of the purposes for which loans are taken by the members of societies, both agricultural and non-agricultural, shows that they use their increased credit mainly for reproductive objects and for the repayment of debt and comparatively little for expenditure on social ceremonies. Indeed, one of the direct results of the formation of societies is to discourage extravagance of this nature. In these circumstances, the question of reducing the rate of interest charged by societies to their members may safely

be taken up as proposed by the Registrar, more especially as the present most usual rate of 18½ per cent. appears to be higher than is charged in most other provinces and higher than is warranted by the rate at which the societies can now obtain their funds from outside sources. The Registrar is in consultation with the Director of Agriculture regarding the formation of societies designed to extend the use of agricultural improvements. One such society, the Mahakali Moslem Bank in Dacca, which was formed to enable its members to purchase bonemeal manure, has proved successful in every respect, and the Governor in Council earnestly trusts that it will be possible at an early date to frame further practical schemes of this kind, suited to local requirements.

8. The Governor in Council desires to congratulate Mr. Jamini Mohan Mitra on the success of his labours, and to thank him for his able and interesting report, which reveals a thorough mastery of all branches of co-operative work, and a real spirit of enthusiasm tempered by sound judgment and commonsense. Mr. Mitra has fully justified his selection for the appointment of Registrar in this Presidency, and His Excellency in Council is satisfied that the movement is developing on sound and healthy lines. Perhaps one of the most gratifying features of the report is that the Registrar is able for the first time to record a marked increase in public interest in the movement and in the number of non-official workers. The public interest is reflected in the amount of space devoted in the leading newspapers of the province to accounts and criticisms of co-operative work, and there has been a material increase during the year, not merely in the number of workers but also in the quality and value of their work. There are now many private persons in various parts of the province, imbued with the true co-operative spirit, and capable and desirous of extending the movement and guiding its advance. To all these gentlemen and to others, who have contributed in any way during the year to the development of co-operative work in this Presidency, the Governor in Council tenders his hearty thanks. He trusts that this brief review of the progress and present position of the movement in Bengal will induce all who are interested in co-operation, and some who are not at present so interested, to study the Registrar's report for themselves, and to emulate the many excellent examples which they will find there set forth.

By order of the Governor in Council,

J. H. KERR,

*Secretary to the Government of Bengal.*

## DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 12th January 1914.

**Summary.**—During the week under report no rain fell throughout the province. Harvesting of winter rice is in rapid progress and has been nearly completed in some districts. The outturn is reported to be fairly good. The standing *rabi* crops are doing well. Cattle-disease is reported from seven districts only. The average price of common rice has fallen by about 0.45 per cent. as compared with that of the previous week. Agricultural loans and Government gratuitous relief were given in the Birbhum and Midnapore districts.

*No. 32 L.R.—The 3rd January 1914.*—The following order is republished from the *Gazette of India* of the 20th September 1913 :—

No. 7552—7581—121, dated Simla, the 15th September 1913.

**RESOLUTION**—By the Government of India, Commerce and Industry Department.

IN supersession of the rules published with Resolution No. 18—17—2, dated the 20th May 1899, the Governor-General in Council is pleased to prescribe the following rules for regulating the grant by Local Governments of licenses to prospect for minerals and the grant of mining leases in British India :—

*Rules for the grant by Local Governments of Licenses to prospect for Minerals and of Mining Leases in British India.*

The following rules regulating the grant by Local Governments of licenses to prospect for minerals and the grant of leases of mines and minerals have been made by the Governor-General in Council, and sanctioned by the Secretary of State for India in Council :—

**PART I.—GENERAL.**

1. No license to prospect for minerals or lease of mines and minerals can be granted by any Local Government otherwise than in accordance with these rules, except with the previous sanction of the Secretary of State for India in Council, or with that of the Governor-General in Council under any general or special authority which he may have received in this behalf from the Secretary of State in Council.

2. In these rules :—

“Collector” means the Revenue Officer in charge of the district ;

“Local Government” includes a Chief Commissioner ; and

“Person” includes, besides individuals, a public company registered in India or in the United Kingdom, having a duly empowered agent resident in India, or a syndicate, partnership or private firm of which one or more of the members reside in India, or which has a duly authorised agent resident in India.

3. A license or lease under these rules may be granted to any person ; in case of the death of the person or any of the persons to whom it is granted, it shall inure for the benefit of his legal representatives.

4. For the purposes of these rules the Local Government may, in Provinces where there is a Board of Revenue or Financial Commissioner, delegate to such authority all or any of the powers conferred on the Local Government by these rules.

5. Nothing in these rules shall apply to minor minerals, such as slate, building stone, limestone and clay, the extraction of which will continue to be regulated by such separate rules as the Local Government may lay down in accordance with local circumstances and requirements.

6. The issue of exploring licenses authorising the surface of land to be searched for minerals having been discontinued, the surface of unoccupied and unreserved land which is the property of Government may be freely searched without authority. In the case of occupied land search can be made only with the consent of the occupier :

Provided that in the case of Baluchistan and the North-West Frontier Province, no operations for the exploration of the surface of land for minerals shall be carried on, except under a license granted on such terms as the Local Administration may prescribe.

*Certificate of approval.*

7. No prospecting license or mining lease shall be granted except to a person holding a certificate of approval from the Local Government within whose jurisdiction the land lies for which the license or lease is asked.

8. A certificate of approval shall have effect from the date thereof, and shall expire at midnight on the 31st of December next following ; provided that a certificate issued in the last quarter of the year shall be valid until the

31st of December of the year following. Only one person shall be named in the certificate. The fee payable therefor shall be Rs. 50, and the certificate shall cover applications in respect of minerals of all kinds.

9. A certificate of approval may be renewed at the discretion of the Local Government on payment of a fee of Rs. 10, if the application for renewal is received within one month after the date of expiry of the original certificate. Otherwise the full fee of Rs. 50 shall be charged. The Local Government may delegate to any officer, not below the rank of Collector, the power to renew a certificate of approval on payment of the prescribed fee, in any case in which the certificate-holder has carried on operations under a prospecting license or mining lease within the jurisdiction of the officer to whom the power is delegated.

10. The names of persons to whom certificates of approval have been granted shall be published in the Local Government Gazette, and every application for a prospecting license or a mining lease shall contain a statement of the number and date of the Gazette notification of the certificate of approval.

11. Before considering an application for a prospecting license or a mining lease, the Collector shall verify the Gazette notification quoted, and shall refuse any application for a license or a mining lease from a person not in possession of a valid certificate of approval: provided that the Collector may at his discretion require the production of the original certificate of approval.

12. Licenses or leases previously granted may be held by a grantee who is no longer in possession of a certificate of approval.

#### **PART II.—PROSPECTING LICENSES.**

13. A license to prospect for minerals or mineral oil, called hereinafter a prospecting license, shall confer on the licensee the sole right, subject to the conditions contained in the license, to mine, quarry, bore, dig and search for, win, work, and carry away any mineral or mineral oil lying, or being within, under or throughout the land specified in the license.

Provided that the right to prospect for reserved minerals shall be exercised only by British subjects.

14. A prospecting license shall be granted only in respect of land in which the mines, minerals, or mineral oils are the property of Government.

15. Every application for a prospecting license shall, unless the Local Government shall in any case otherwise direct, be made to the Collector of the district in which the land or some part of the land with respect to which the license is required is situate.

16. Every such application shall contain the following particulars, namely:—

(a) The name, profession and residence of the applicant, if he is an individual; or if the applicant is a company, syndicate, partnership or private firm, its name, and nature and place of business; and if the place of business is outside India, the name and residence of a member or duly authorised agent resident in India.

(b) A description, illustrated by a map or plan, showing as accurately as possible the situation, boundaries and area of the land with respect to which the license is required.

17. Should the applicant for a prospecting license desire the Collector to prepare for him the map or plan required by the foregoing rule, or should the map or plan presented by the applicant be insufficient, the Collector may prepare the map or plan required, and may, if he so order, recover the cost from the applicant at such rate or rates as the Local Government may by general order prescribe.

18. The Local Government may declare, in respect of any specified area, that in lieu of presenting an application containing the particulars required in rule 16 above, the applicant for a prospecting license shall adopt the

procedure set forth below, or such modification thereof as the Local Government may prescribe:—

(1) He shall, before forwarding his application to the Collector, demarcate the area applied for in the following method:—

- (a) At every angle or corner of each boundary line or as near thereto as is practicable, he shall fix pegs of substantial material, standing not less than 2 feet above the surface of the ground, and being not less than 3 inches square or 3 inches in diameter.
- (b) If pegs be not obtainable, he may use instead cairns of stones or mounds of earth, having in each case a height of not less than 2 feet and a diameter at the base of not less than 2 feet.
- (c) The direction of the boundary line on each side of each peg, cairn or mound shall be indicated with reasonable care by a trench having a length of 4 feet, and a breadth and depth of not less than 6 inches: provided that if trenches cannot be conveniently cut, the direction of the boundary lines shall be indicated by finger posts, or in any other manner suitable for the purpose.
- (d) The pegs, cairns or mounds shall bear or have affixed thereto some distinguishing mark which shall be described in the application.
- (e) In the case of an application for land on the seashore, it shall not be necessary to mark out the land below high-water level.
- (f) No peg, cairn, mound, or other mark employed in marking out the land applied for shall be removed or defaced after the application shall have been filed without the permission of the Collector.

(2) The application to the Collector shall contain the following particulars, viz.:—

- (a) The name, profession and residence of the applicant, if he is an individual; or if the applicant is a company, syndicate, partnership or private firm, its name, and nature and place of business, and if the place of business is outside India, the name and residence of a member or duly authorised agent resident in India.
- (b) A description, as accurate as possible, and illustrated by a sketch, of the situation, boundaries and area of the land with respect to which the license is required.
- (c) A description of the distinguishing mark on the pegs, cairns or mounds constructed to mark out the boundaries of the concession applied for.
- (d) The date of marking out the concession applied for.

(3) The application shall be accompanied by a deposit at such rate or rates as the Local Government may by general order prescribe to meet the cost of survey of the area.

(4) Unless the Collector is of opinion that it is not expedient to grant the license, he shall, as soon as possible after the receipt of the application, cause the land applied for to be surveyed at the expense of the applicant, and the area and all other details ascertained in the course of such survey shall be presumed to be correct. Provided that the Collector may at his discretion dispense with such survey, if the boundaries of the area applied for conform to boundaries already ascertained in a Government survey, *e.g.*, the boundaries of survey numbers in a revenue survey.

19. On receipt of any application under rule 16 or rule 18 the Collector, or such officer as he may authorise to do so, shall note thereon the date and hour of its receipt, and shall deliver to the applicant an acknowledgment stating the date and hour of receipt.

20. The Collector shall then as soon as practicable inquire whether the grant of the license applied for is inexpedient, either on the ground that the land described in the application is required for a public purpose or otherwise.

21. Should the Collector be of opinion that it is not expedient to grant the license he shall refuse to grant it. An appeal shall lie from the order of the Collector to the next higher revenue authority.

22. Subject to the control of the Local Government, the Collector, if he finds that the applicant is in possession of a valid certificate of approval and that there is no objection to the grant of the license applied for, may grant to the applicant a license in such form as may be prescribed.

23. In the case of two or more applications affecting the same land, the prior right to a license shall, subject to any order to the contrary which the Local Government may in its discretion pass in any particular case, be deemed to lie with the applicant, who, being the holder of a valid certificate of approval and after compliance with the procedure prescribed by the rules, shall have been the first to file his application with the Collector.

24. Every applicant shall, before the license is granted, deposit, as security in respect of such license, a sum of Rs. 100 per square mile or part of a square mile of the area covered by the license, or, with the Collector's permission, give security to a like amount to the satisfaction of the Collector.

25. Subject to such deduction on account of compensation for surface damage, penalty, or otherwise as the Collector may order, the amount of any deposit made under the foregoing rule, should the depositor afterwards be granted a mining lease, will be carried to his credit as part of the rents, royalties or deposit money payable under the lease. Or should he decline to receive or fail to obtain any such lease as aforesaid, the amount will be returned to him on his satisfying the Collector that the condition in rule 30 (viii) has been complied with and on his furnishing the Collector with the information required by rule 33.

26. If a license is not executed within three months after leave has been granted for it, the right of the applicant to such license shall be held to have lapsed, unless the Local Government, for special reasons, consents to grant the same notwithstanding the delay or considers that the delay is not attributable to the applicant.

27. A register of applications for prospecting licenses shall be kept in English in the Collector's Office, specifying—

- (1) Serial number,
- (2) Name of applicant,
- (3) Residence of applicant,
- (4) Date and number of certificate of approval granted to applicant,
- (5) Date of application,
- (6) If application received incomplete, the date of completion,
- (7) Situation and boundaries of the land,
- (8) Estimated area,
- (9) Date of license, if granted; (or date of order of refusal),
- (10) Period for which granted, with note as to renewal or extension,
- (11) Fee and royalty payable under rule 30 (ii) and (iii),
- (12) Amount of deposit, and
- (13) Particulars of disposal or refund of deposit.

28. The register shall be open to inspection by any holder of a valid certificate of approval or his duly authorised representative, on payment of such fee as the Local Government may prescribe.

29. A return of licenses granted or refused shall be submitted by the Collector at such intervals and to such authority as the Local Government may direct.

30. Every prospecting license shall contain such conditions as may in any particular case seem necessary, and shall in all cases contain the following conditions:—

- (i) The term for which the license shall be granted shall be one year or such shorter term as the applicant may desire. The license may be renewed by the Collector for a further term not exceeding two years, whenever he is satisfied that a longer period than one year is required in order to enable the licensee to complete his search of the land:

Provided that, when the licensee has, before the termination of the period of the license, applied for the grant of a mining lease, the Collector may further extend the period of the license until a mining lease is granted or for such time as he may deem fit.

- (ii) The licensee shall pay a fee not exceeding one rupee and not less than one anna per acre of the land covered by the license. When a license is renewed under the last foregoing condition, a fresh fee shall be payable, subject to the same maximum and minimum charge, for each year or part of a year for which the license is renewed. But no fee shall be payable for an extension of the term of license under the proviso to that condition.
- (iii) The licensee shall pay royalty at a rate not exceeding 15 per cent. of the value on all precious stones won and carried away, and a royalty at the rates specified in Schedule A in Part IV of these rules on all other minerals won and carried away over and above such quantity as is allowed in Schedule B to be taken free for purposes of experiment.
- (iv) The licensee shall make and pay such reasonable satisfaction and compensation as may be assessed by lawful authority in accordance with the law in force on the subject applying to the lands over which the license has been granted, for all damage, injury or disturbance which may be done by him in exercise of the powers granted by the license, and shall indemnify the Government against all claims which may be made by third parties in respect of any such damage, injury or disturbance.

**NOTE.**—The powers necessary for the proper enjoyment of minerals, the property of Government, together with the methods according to which such powers are to be exercised by Government or by its assignees, are governed by the law for the time being in force in each province. Where the law confers such powers on the Local Government or its assignees, the Local Government may make local rules indicating the conditions on which licensees shall have right of access to minerals, the right to use of water in connection with the working thereof, and the like.

- (v) The licensee shall not cut or injure any tree on unoccupied and unreserved land without the permission in writing of the Collector, or of such officer or officers as he may appoint: nor, without the permission of the Collector, shall he disturb the surface of any road, or enter on any public pleasure ground, burning or burying ground, or place held sacred by any class of persons, or interfere with any right-of-way, well or tank.
- (vi) The licensee shall have power to assign his license or transfer any right or interest thereunder to a person holding a valid certificate of approval subject to the following conditions:—
  - (a) No such assignment or transfer shall be made in favour of any person who, by himself or by those joint in interest with him, already holds a mining lease or leases over ten square miles within the territories administered by the Local Government within whose jurisdiction the land lies for which the license has been granted.

The actual position of the transferee in this matter, if not known to the licensee, should be ascertained from the Local Government.

(b) Every such assignment or transfer shall be reported to the Collector within one calendar month from the date of its completion, together with full particulars of the transaction.

(c) Every such assignment or transfer shall, within a further period of two months, be registered in the office of the Collector on payment of a fee of Rs. 50:

Provided that in the case of any particular mineral reserved by order of the Governor-General in Council, the previous sanction of the Local Government to the assignment or transfer shall be required.

The minerals reserved at present are petroleum, chromite, and ores of manganese, vanadium, molybdenum, nickel, and tungsten.

Provided also that in the North-West Frontier Province and Baluchistan no transfer or assignment in the case of any mineral whatever may be made without the consent of the Agent to the Governor-General and Chief Commissioner.

(vii) In case of any breach on the part of the licensee or his transferee or assignee of any of the preceding clauses, the Collector may summarily revoke the license, and thereupon all rights conferred thereby or enjoyed thereunder shall cease; or, should he see fit, he may, in lieu thereof, declare to be forfeited to Government the whole or any part of the deposit made by the licensee under rule 24. An appeal shall lie to the Local Government against any such order within thirty days from the date of its communication to the licensee.

(viii) Save in the case of land over which the licensee shall have been granted a mining lease on or before the determination of the license, he shall, within six months next after the determination of the license or the date of the abandonment of the undertaking, whichever shall first occur, securely plug any bores and fill up or fence any holes or excavations that he may have made in the land to such extent as the Collector may require, and shall to the like extent restore the surface of the land and all buildings thereon which he may have damaged in the course of prospecting:

Provided that the licensee shall not be compelled to restore the surface of land or any buildings in respect of which full and proper compensation has already been paid under condition (iv).

(ix) Should any question or dispute arise regarding the license, or any matter or thing connected therewith or the powers of the licensee thereunder, or the amount or payment of the fee or royalty made payable thereby, the matter in difference shall be decided by the Local Government, whose decision shall be final.

31. All operations conducted under the authority of these rules within a reserved or protected forest shall be subject to such conditions as the Local Government may by general or special order from time to time prescribe. It shall be a condition of every license granted under these rules that, before the commencement of prospecting within a reserved or protected forest, 30 days' notice shall be given to the District Forest Officer of the intention to commence operations, and that the operations shall be conducted subject to any conditions regarding the use of fire that he may prescribe.

32. On or before the determination of his license, the licensee shall have a right—

- (a) in the case of a mineral oil or minerals other than precious stones, to a mining lease in accordance with the terms contained in the rules for mining leases ;
- (b) in the case of precious stones, to the first offer of such mining lease as the Governor-General in Council may think fit to grant.

Such lease may include so much land, comprising the whole or a part only of the area for which the prospecting license was granted, as shall not exceed the area specified with respect to mining leases in rule 45.

33. If so required by the Collector, the licensee shall, before the deposit made under rule 24 is returned to him, disclose confidentially to the Collector all information acquired in the course of the operations carried on under the license, regarding the minerals contained in, or the geological formation of, any area not taken up by him under a mining lease.

### PART III—MINING LEASES.

34. Every application for the grant of a mining lease, not being a lease of a mine of precious stones, shall be presented to the Collector in whose district the land or some part of the land with respect to which the lease is required is situate. The Collector shall forward the application through the proper channel to the Local Government.

35. A mining lease shall be granted only in respect of land in which the mines, minerals, or mineral oils are the property of Government.

36. With the application, the applicant shall deposit as security in respect of preliminary expenses such sum, not exceeding Rs. 500, as the Collector may determine, or, with the Collector's permission, give security to the like amount to the satisfaction of the Collector. If the application relates to an area for which the applicant holds a prospecting license, any amount held in deposit under rule 24 in respect of such prospecting license will be carried to his account.

37. The amount of any deposit made under rule 36, less any expenses incurred by or on behalf of Government, will, if the depositor be granted a mining lease, be carried to his credit, as part of the rent or royalties payable under the lease, or if he declines or fails to obtain any such lease as aforesaid, will be returned to him.

38. Every application for a mining lease shall contain the following particulars, namely:—

- (a) the name, residence and profession of the applicant if he is an individual, or if the applicant is a company, syndicate, private firm or partnership, its name and nature and place of business, and if the place of business is outside India, the name and residence of a member or duly authorised agent resident in India ;
- (b) a specification of the mineral or minerals for which the applicant intends to mine ;
- (c) a description, illustrated by a map or plan, showing as accurately as possible the situation, boundaries and area of the land with respect to which the lease is required ;
- (d) a statement showing all areas within the jurisdiction of the Local Government already held by the applicant or by any person joint in interest with him in prospecting or mining right ;
- (e) the period for which the lease is required.

39. Should the applicant for a mining lease desire the Collector to prepare for him the map or plan required by the foregoing rule, or should the map or plan presented by the applicant be insufficient, the Collector may prepare the map or plan required, and may, if he so order, recover the cost from the applicant at such rate or rates as the Local Government may by general order prescribe.

NOTE.—It shall be competent to the Local Government by general order to direct that an accurate survey be made at the expense of the lessee of all land granted on mining lease, if a map or plan has not been already prepared by the Collector. Such survey may be made at any time after it is decided to grant the lease, the object being to secure an authoritative record of the area covered by the lease.

40. The Local Government may declare in respect of any specified area that in lieu of presenting an application containing the particulars required in rule 38 above, every applicant for a mining lease over an area, in respect of which he is not already in possession of or has not submitted an application for a prospecting license, shall adopt the procedure set forth below, or such modification thereof as the Local Government may prescribe :—

(1) He shall, before forwarding his application to the Collector, demarcate the area applied for in the following method :—

- (a) At every angle or corner of each boundary line, or as near thereto as is practicable, he shall fix pegs of substantial material standing not less than 2 feet above the surface of the ground, and being not less than 3 inches square or 3 inches in diameter.
- (b) If pegs be not obtainable, he may use instead cairns of stones or mounds of earth, having in each case a height of not less than 2 feet and a diameter at the base of not less than 2 feet.
- (c) The direction of the boundary line on each side of each peg, cairn or mound shall be indicated with reasonable care by a trench having a length of 4 feet, and a breadth and depth of not less than 6 inches; provided that if trenches cannot be conveniently cut, the direction of the boundary lines shall be indicated by finger posts, or in any other manner suitable for the purpose.
- (d) The pegs, cairns or mounds shall bear or have affixed thereto some distinguishing mark which shall be described in the application.
- (e) In the case of an application for land on the seashore, it shall not be necessary to mark out the land below high-water level.
- (f) No peg, cairn, mound, or other mark employed in marking out the land applied for shall be removed or defaced after the application shall have been filed without the permission of the Collector.

(2) The application to the Collector shall contain the following particulars, viz. :—

- (a) The name, profession and residence of the applicant, if he is an individual; or if the applicant is a company, syndicate, partnership or private firm, its name and nature and place of business, and if the place of business is outside India, the name and residence of a member or duly authorised agent resident in India.
- (b) A description, as accurate as possible, and illustrated by a sketch, of the situation, boundaries and area of the land with respect to which the lease is required.
- (c) A description of the distinguishing mark on the pegs, cairns or mounds constructed to mark out the boundaries of the concession applied for.
- (d) The date of marking out the concession applied for.
- (e) A specification of the mineral or minerals for which the applicant intends to mine.
- (f) A statement showing all areas within the jurisdiction of the Local Government already held by the applicant or any person joint in interest with him in prospecting or mining right.
- (g) The period for which the lease is required.

(3) The application shall be accompanied by such deposit, in addition to that prescribed in rule 36 above, as the Local Government may, by general or special order, declare to be required to meet the cost of survey of the area.

(4) The Collector shall, as soon as possible after the receipt of the application, cause the land applied for to be surveyed at the expense of the applicant, and the area and all other details ascertained in the course of such survey shall be presumed to be correct.

41. On receipt of any application under rule 38 or 40 above, the Collector, or such officer as he may authorize to do so, shall note thereon the date and hour of its receipt, and shall deliver to the applicant an acknowledgment stating the date and hour of receipt.

42. In the case of two or more applications affecting the same land and presented by applicants who are not in possession of, or have not applied for, prospecting licenses in respect thereof, the prior right to a lease shall, subject to any order which the Local Government may pass in any particular case, be deemed to lie with the applicant who, being the holder of a valid certificate of approval and after compliance with the procedure prescribed by the rules, shall have been the first to file his application with the Collector.

43. A register of applications for mining leases shall be kept in English in the Collector's office specifying, as far as may be, the matters prescribed by rule 27 for the register of applications for prospecting licenses.

44. The register shall be open to inspection by any holder of a certificate of approval or his duly authorised representative on payment of such fee as the Local Government may prescribe.

45. On receipt of the application from the Collector, the Local Government may, if the applicant is entitled to a lease under rule 32, or if it considers that the applicant should be granted a mining lease, grant the same in accordance with these rules over such area as it may think fit:

Provided that no mining lease shall be granted by the Local Government under these rules, so as to cause the total area held under mining leases for minerals of whatsoever kind by the lessee or by those joint in interest with him to exceed ten square miles within the territories administered by the Local Government.

46. If a lease is not executed within six months after leave has been granted for it, the right of the applicant to such lease shall be held to have lapsed, unless the Local Government for special reasons consents to grant the same notwithstanding the delay, or considers that the delay is not attributable to the applicant.

NOTE.—Every lease shall, before it is executed, be approved by the Advocate-General or other legal adviser, if any, appointed for the Province.

47. Without the previous sanction of the Governor-General in Council, the length of an area held under the mining lease shall not be allowed to exceed four times its breadth:

Provided that this rule shall not apply to areas in river beds held on lease for dredging purposes, in respect of which the Local Government may, with the sanction of the Governor-General in Council, make rules as to the dimensions and shape of areas for which such leases may be granted.

Provided also that the Governor-General in Council may delegate to the Local Government the power to grant exemption from the operation of this rule in respect of specified minerals and subject to such restrictions as to limit of length or otherwise as he may think fit.

48. The boundaries below the surface of all areas given out on mining lease under these rules shall be considered to run vertically downwards towards the centre of the earth.

The term for which a mining lease may be granted shall not exceed 30 years, but the lease may contain a clause permitting renewal for a period not exceeding 30 years, on a dead and surface rent not exceeding twice the original dead and surface rent respectively, the royalty payable being that which it may, on the day next following that on which the original lease shall determine.

50. Every mining lease shall contain such conditions and stipulations as the Local Government may in each case consider necessary; and shall in every case contain the following conditions, namely:—

- (i) The lessee shall pay a royalty or royalties at the rate specified in the lease, which rate or rates shall be those fixed for the particular mineral or minerals in Schedule A in Part IV of these rules; and if any other mineral shall be discovered by him, then the royalty shall be paid therefor at such rate, not being less than 20 per cent. of the value thereof, as the Local Government may determine, until a mining lease has been obtained in respect of such mineral; but the lessee shall be entitled within twelve months from the discovery of such mineral to require and obtain such lease for the term then unexpired of his original lease; provided that, if he declines to take a lease as above provided, the Local Government may give a lease in respect of such mineral to any other person.
- (ii) The lessee shall also pay for every year after the first year a fixed yearly dead rent at a rate not less than that laid down in Schedule C in Part IV of these rules; provided that no lessee shall pay both royalty and dead rent in respect of the same lease, but only such one of them as may be of the greater amount.
- (iii) The lessee shall also pay for all land which he may take up, use, or occupy for the purpose of the mine a surface rent at the rate specified in Schedule D.
- (iv) The lessee shall at his own expense erect and at all times maintain and keep in repair boundary marks and pillars according to the demarcation to be shown in a plan annexed to his lease.
- (v) The lessee shall make and pay such reasonable satisfaction and compensation, as may be assessed by lawful authority in accordance with the law in force on the subject applying to the lands over which the lease has been granted, for all damage, injury or disturbance which may be done by him in exercise of the powers granted by the lease, and shall indemnify the Government against all claims which may be made by third parties in respect of any such damage, injury or disturbance.

NOTE.—The powers necessary for the proper enjoyment of minerals, the property of Government, together with the methods according to which such powers are to be exercised by Government or by its assignees, are governed by the law for the time being in force in each province. Where the law confers such powers on the Local Government or its assignees, the Local Government may make local rules indicating the conditions on which lessees shall have right of access to minerals, the right to use of water in connection with the working thereof, and the like.

- (vi) The lessee shall not cut or injure any tree reserved in the lease.
- (vii) The lessee shall have power to assign his lease or transfer any right or interest thereunder to a person holding a valid certificate of approval subject to the following conditions:—
  - (a) No such assignment or transfer shall be made in favour of any person who, by himself or by those joint in interest with him, already holds a mining lease or leases which is or are, or which with the addition of the area now proposed for assignment or transfer will be over ten square miles within the territories administered by the Local Government within whose jurisdiction the land lies for which the lease has been granted. The actual position of the transferee in this matter, if not known to the lessee, should be ascertained from the Local Government.
  - (b) Every such assignment or transfer shall be reported to the Collector within one calendar month from the date of its completion, together with full particulars of the transaction.

(c) Every such assignment or transfer shall, within a further period of two months, be registered in the office of the Collector on payment of a fee of Rs. 50 :

Provided that in the case of any particular mineral reserved by order of the Governor-General in Council, the previous sanction of the Local Government to the assignment or transfer shall be required.

The minerals reserved at present are petroleum, chromite and ores of manganese, vanadium, molybdenum, nickel and tungsten :

Provided also that in the North-West Frontier Province and Baluchistan, no transfer or assignment in the case of any mineral whatever may be made without the consent of the Agent to the Governor-General and Chief Commissioner.

(viii) Unless prevented by reasonable cause of which the Local Government shall be the judge, the lessee shall commence operations within one year from the date of the execution of the lease and shall thereafter carry them on effectually in a proper, skilful and mining-like manner. Should the lessee cease without such cause to work the mine for a period exceeding two years in such a manner as to produce sufficient mineral to earn a royalty at least equal to the dead rent, it shall be deemed a breach of this condition.

NOTE.—For the purpose of the first part of this condition, such measures as the erection of machinery for the purposes of working the mine, although not necessarily on the land covered by the lease or the construction of roads or tramways in connection with the mine, shall be deemed to be sufficient compliance with the requirement of commencing operations.

(ix) The lessee shall keep correct accounts showing the quantity and particulars of all minerals obtained from the mine and the number of persons employed therein, and also complete plans of the mine, and shall allow any officer authorised by the Local Government in that behalf at any time to examine such accounts and plans, and shall furnish the Local Government with such information and returns in respect of the aforesaid matter as it may prescribe.

(x) The lessee shall allow existing and future license or lease-holders of any land which is comprised in or adjoins or is reached by the land held by the lessee reasonable facilities of access thereto.

(xi) The lessee shall allow any officer authorised by the Local Government in that behalf to enter upon the premises comprised in the lease for the purpose of inspecting the same.

(xii) The lessee shall without delay report to the Collector the discovery on or within any of the lands or mines demised by the lease of any mineral not specified in the lease.

(xiii) Should the royalty or rent reserved or made payable by the lease be not paid within two months next after the date fixed in the lease for the payment of the same, the Local Government may enter upon the said premises and distrain all or any of the minerals or moveable property therein, and may order the sale of the property so distrained or so much of it as will suffice for the satisfaction of the rent or royalty due and all costs and expenses occasioned by the non-payment thereof; and, if any royalty or rent remain at any time unpaid for six calendar months after the date on which it is due, the Local Government may determine the lease and take possession of the premises comprised therein.

(xiv) In case of any breach on the part of the lessee of any covenant or condition contained in the lease, the Local Government may determine the lease and take possession of the said premises; or, in the alternative, may accept payment of a penalty, not exceeding twice the amount of the annual dead rent, from the lessee.

(xv) At the end or sooner determination of the lease, the lessee shall deliver up the said premises and all mines (if any) dug therein in a proper and workmanlike state, save in respect of any working as to which the Local Government may have sanctioned abandonment.

(xvi) Should any question or dispute arise regarding the lease or any matter or thing connected with the mines and minerals leased or the working or non-working thereof or the amount or payment of the royalty or rent reserved or made payable by the lease, the matter in difference shall be decided by the Local Government, whose decision thereon shall be final.

51. All operations conducted under the authority of these rules within a reserved or protected forest shall be subject to such conditions as the Local Government may by general or special order from time to time prescribe. It shall be a condition of every lease granted under these rules that before the commencement of work within a reserved or protected forest, 30 days' notice shall be given to the District Forest Officer of the intention to commence operations, and that the operations shall be conducted subject to any conditions regarding the use of fire that he may prescribe.

52. Every mining lease which includes any portion of a reserved or protected forest shall, if it authorises the lessee to fell timber for mining purposes, specify the area within which, or the quantity up to which, and the terms and conditions upon which, he may exercise that authority.

53. No lease of a mine of precious stones shall be granted except by the Governor-General in Council. The procedure for obtaining, and the conditions of, such lease shall be those prescribed by rules 34 to 50, read as if the Governor-General in Council were substituted for the Local Government.

54. ### KING'S POLICE MEDAL.

*Delhi, the 1st January 1914.*

No. 1 C.—The King-Emperor has been pleased to confer the King's Police Medal on the following officers and men of the Indian Police establishments :—

### BENGAL.

Name of officer and rank	Statement of services for which in particular the decoration has been conferred.
15. Mr. Ralph Buller Hughes-Buller, C.I.E., I.C.S., recently Officiating Director, Criminal Intelligence, now Inspector-General of Police, Bengal.	For valuable work in police administration.

**PART IA] THE CALCUTTA GAZETTE, JANUARY 7, 1914.**

Name of officer and rank.	Statement of services for which in particular the decoration has been conferred.
16. Goanbir Rai, Constable, Bengal Police.	For conspicuous gallantry in arresting criminals. At Bebuldangi in Purnea, in March 1912, along with Deputy Superintendent Sivaprasad Regmi, he attacked at night a party of about 30 dacoits who were armed with guns and shot one of them dead and wounded several others.
17. Captain Edmund Denman Dallas-Smith, I.A., Assistant Commandant, Dacca Military Police Battalion.	For good work in connection with the capture of the Chinlong village on the Naga Hills on the 5th February 1913. He acted as Staff Officer and discharged his duties as such most efficiently. He was deputed to take charge of the rear guard when the baggage guard was attacked by the enemy and the coolies stampeded, and his prompt and effective dispositions were of the greatest assistance to the whole column.
18. Mohin Chandra, Lance-Naik of the Dacca Military Police Battalion.	For laudable courage on the occasion of the capture of the Chinlong village on the Naga Hills on the 5th February 1913. When the rear portion of the baggage guard was first attacked, he immediately mobilised a group and opened fire on the enemy. Two of his men were killed and two others severely wounded, but he held on to his position and continued firing until the enemy scattered.
19. Dhanja Ram, Sepoy of the Dacca Military Police Battalion.	For conspicuous courage in connection with the capture of the Chinlong village on the Naga Hills on the 5th February 1913, in the course of which he was severely wounded.
20. Dhaga Ram, Havildar of the Dacca Military Police Battalion.	For excellent work in the capture of the Chinlong village on the Naga Hills on the 5th February 1913, and the display of great courage and resource on the occasion of the second attack on the baggage guard by forming a group and at once opening fire on the enemy.

### GOVERNMENT OF INDIA.

#### HOME DEPARTMENT.

#### NUMBER OF APPOINTMENTS LISTED AS OPEN TO THE PROVINCIAL CIVIL SERVICE IN BENGAL, BIHAR AND ORISSA AND ASSAM.

##### ESTABLISHMENTS.

*Delhi, the 19th December 1913.*

#### RESOLUTION.

PRIOR to the creation of the Bengal Presidency as now constituted and the provinces of Bihar and Orissa and Assam the following appointments, ordinarily filled by members of the Indian Civil Service, were included in the list of appointments open to members of the Provincial Civil Service in Bengal and Eastern Bengal and Assam :—

##### *Bengal.*

##### Superior appointments—

(a) Headships of districts	...	...	3
(b) District and Sessions Judgeships	...	...	4
(c) Junior Secretaryship to the Board of Revenue	...	...	1
			<hr/>
			8

##### Inferior appointments—

(d) Under-Secretaryship to Government	...	...	1
			9

##### *Eastern Bengal and Assam.*

##### Superior appointments—

(a) Headships of districts	...	...	
(b) District and Sessions Judgeships	...	...	

##### Inferior appointments—

(c) Junior Secretaryship to the Board of Revenue	...	...	1
(d) Under-Secretaryship to Government	...	...	1

2. On the reconstitution of the provinces in April 1912, the Government of India made the following redistribution of the listed appointments, subject to confirmation by the Secretary of State for India:—

	Bengal.	Bihar and Orissa.	Assam.	Total.
Superior posts ...	7	5	1	13
Inferior post (Under-Secretaryship to Government) ...	1	1	...	2
	<u>8</u>	<u>6</u>	<u>1</u>	<u>15</u>

The appointment of Junior Secretary to the Board of Revenue, Bengal, has been recently abolished, and in the province of Bihar and Orissa there is only one Secretary to the Board of Revenue. One additional superior appointment has, however, been made over to the Provincial Civil Service in the Bengal Presidency in lieu of the appointment of Junior Secretary to the Board of Revenue, and a new post of District and Sessions Judge recently created has also been assigned to the Provincial Service. In view of the fact that the whole question of listing appointments has been for some time under consideration and will doubtless be reviewed afresh by the Royal Commission on the Public Services in India, the Government of India do not consider it necessary, at this stage, to insist upon the specification of the precise number of each class of superior appointment to be listed in the Bengal Presidency and in Bihar and Orissa, and the Secretary of State's approval has been obtained to the listing of the following appointments in the three provinces:—

	Superior.	Inferior.	Total.
Bengal Presidency ... Headships of Districts or District and Sessions Judgeships ...	8	Under-Secretaryship to Government ...	1
Bihar and Orissa ... Ditto ...	5	Ditto ...	1
Assam ... District and Sessions Judgeship ...	1	...	...
	<u>14</u>	<u>2</u>	<u>16</u>

The Governments of Bengal and Bihar and Orissa will be at liberty, as circumstances may demand, to vary within these totals, the number of each class of superior appointment to which members of the Provincial Civil Service are actually appointed.

3. The Governor-General in Council is also pleased to declare, with the Secretary of State's approval, that the following rates of pay shall be attached to the several appointments in question when held by officers of the Provincial Civil Service:—

(i) Headships of districts—

	Rs.
1st grade ...	1,600
2nd grade ...	1,200
3rd grade ...	1,000

(ii) District and Sessions Judgeships—

	Rs.
1st grade ...	2,000
2nd grade ...	1,600
3rd grade ...	1,200

(iii) Under-Secretaryship to Government ... 700

ORDER.—Ordered that a copy of this resolution be forwarded to the Governments of Bengal and Bihar and Orissa, to the Hon'ble the Chief Commissioner of Assam and to the Finance Department for information, and that it be published in the supplement to the *Gazette of India* for general information.

SIBPUR, the 26th April 1912.

**NOTICE.**

HER EXCELLENCY LADY HARDINGE of Penshurst has decided to give, out of the funds which have been collected for a Medical College for Women at Delhi, a certain number of scholarships for lady students who may wish to join that institution, when it is opened.

2. It is proposed to allot 18 scholarships of Rs. 30 a month each, tenable for two years. Four scholarships are allotted for students who are residents of the Presidency of Bengal.

3. The object of the scholarships being to enable ladies to enter the College at Delhi and take up a professional course there, the award will be made on the result of the Matriculation, School Final or School-leaving Certificate examination, the object of this procedure being to enable such students as have already enrolled themselves in colleges or have just completed their school course to pass the Intermediate examination of a University or an examination recognized as equivalent thereto in 1915, and thus to render themselves eligible so far as the examination qualifications are concerned, and to enter the college at Delhi at its opening.

4. Candidates for these scholarships must be statutory natives of India. They must also guarantee that they will study, for two years in a college affiliated to the local University, the course leading up to the Intermediate examination, or an examination recognized for this purpose as equivalent thereto, such special subjects as may be prescribed by that University as qualifying for entrance upon a professional course of medical study being included in the course. They must also undertake that on the completion of these two years they will seek admission to the Medical College to be established at Delhi, and continue their studies up to the examinations for the Medical degree for which that College will prepare students. Should the College be not completed by the close of 1915, suitable arrangements will be made for the instruction of the students elsewhere, until the College is ready to receive them.

5. The question of providing scholarships tenable during the period of study in Delhi is under consideration by the Governing Body of the College. It is hoped to make an announcement on this subject within the next six months. The continuance of the scholarships and the award of any further scholarships will be contingent on the progress of the scholars and the receipt by the Local Government of good reports upon them.

6. Scholarships will be awarded to such lady students as the Local Government may, on the results of the examination which closes the secondary school course, regard as most likely to profit by the facilities which the proposed College at Delhi will offer. Applications in the enclosed form, which must be submitted through the head of the College or head of a high school of which the applicant is a student, will be received in the office of the Director of Public Instruction, Bengal, up to the 15th January 1914. The scholarships will run for two years from the date on which each particular scholarship-holder enters on her preliminary course of study. In the case of a lady student who has already entered upon a course of study, the successful completion of which would qualify her for admission to the College, a scholarship may be awarded with retrospective effect from the date on which she entered upon the course or any date subsequent thereto.

W. W. HORNELL,

*Director of Public Instruction, Bengal.*

1. Name of candidate ... ..

2. Date of birth (the year, and the actual date of the month, if possible, must be stated).

3. Nationality—

In the case of a pure European candidate the application must be accompanied by a duly authenticated statement to the effect that the applicant is a native of India within the meaning of the Statute, viz., that she was born of parents habitually resident in India and not established there for temporary purposes only.

4. Caste ... ..

5. Name of father or guardian ...

In the case of European or Anglo-Indian candidates the names of both parents should be given and it should be stated whether they are living or not. In the event of both parents being dead, the name of the guardian must be given and his or her relationship to the applicant must be stated.

6. Place of residence ... ..

7. Education ... ..

The names of the various schools or colleges at which the applicant has studied should be stated with dates in each case. The public examinations passed should be stated, as also any special distinctions gained.

8. Whether the applicant made any special study of any branch of science.

9. Whether the candidate, or her parent or guardian, in case she is still a minor, is prepared to execute a bond to refund the scholarship money, if she fails to abide by the conditions of award of these scholarships as detailed in paragraph 4 of the rules.

10. Names of relatives of position, and the precise relationship each bears to the candidate.

11. Names of two persons of position to whom reference regarding the candidate can be made.

12. Remarks of the Principal of the College at which the candidate is studying at present.

**MECHANICAL AND ELECTRICAL ENGINEERING.**

A **THREE-YEAR** course leading to the Mechanical and Electrical Over Certificate Examination of the Joint Technical Examination Board be started at the Civil Engineering College, Sibpur, on 19th January (Candidates will not be presented for the Sub-Overseer Examination allowed to join the Civil Overseer course.)

There is no limit of age.

Applicants must have passed one of the following Examinations:—

- Any recognised School Final Examination.
- The Matriculation Examination of an Indian University.
- The Junior Cambridge Local Examination.
- The Middle School Examination of the Code for European Schools.
- The Examination held at the end of the Supplementary Indian course for Elementary European Schools.

## THE INDIAN LAW REPORTS.

Published in FOUR SERIES, viz.

CALCUTTA, MADRAS, BOMBAY AND ALLAHABAD.

THE Indian Law Reports, published under the authority of the Governor-General in Council, are printed in monthly Parts, which are issued, as soon as possible after the first of each month, at Calcutta, Madras, Bombay and Allahabad, respectively.

The Reports comprise four Series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court.

The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay and Allahabad, respectively.

Persons desiring to subscribe for or purchase the Reports should apply to—

the Officer in charge Bengal Secretariat Book Depôt, Calcutta, or  
the Superintendent, Government Press, Madras, or  
the Superintendent, Government Central Press, Bombay, or  
the Curator of Government Books, United Provinces of Agra and Oudh, Allahabad.
